

This retrospective planning application does not make reference to the tippee.

Environmental health received the first complaint of noise nuisance on 3/8/2022 from music coming from the beer garden, whether or not in the tippee, however the tippee would not give much reduction in noise as there was no soundproofing properties of the tippee.

Env health has received 8 complaints from 6 individual locations on whalley road and Cheshire court spanning from 3/8/22 to 25/4/2023.

The complaints we received related to music and singing of live and recorded music. No reference was made about people talking and drinking in the beer garden.

Environmental health would not want the venue to be able to play recorded or live music at a volume in the beer garden / tippee that would cause a nuisance to the local residents.
