

Ark Cedar Bird Nest Boxes

Best-selling: an incredibly popular nest box among bird enthusiasts

High-quality: made of strong cedar wood for durability and high-quality finish

Convenient: the handy hinged inspection panel makes cleaning and inspection easy

What is it?

Our Ark Cedar Bird Nest Boxes are one of our bestselling bird boxes and are ideal for gardens of all sizes. They are manufactured from 18mm thick cedar wood for a strong and sturdy finish. Plus, they have hinged sides which makes nest box cleaning and inspection easy.

How does it help?

Adding an attractive nesting box to your garden will encourage wild birds to stake their claim for a new home. Different species of birds enjoy different types of nesting homes, which is why we offer this nest box in two designs: 28mm and 32mm entrance holes — opening the doors to a variety of species from blue tits to house sparrows.

Siting and Positioning:

It is suitable for siting on house walls, trees and even deep in shrubs and ivy clad walls. They are quickly adopted in the right location and will give you and your birds years of reliable service.

Cleaning and Inspection:

To inspect and clean these nest boxes the right side panel of the box is removeable. By twisting the metal key downwards and pulling out the perch type peg, the side panel can be removed. Cleaning should be done between breeding seasons.

Entrance Hole:

28mm

32mm

Open Fronted

Occupants:

28mm Entrance Hole: Blue Tits and occasionally occupied by Coal and Marsh Tits.

32mm Entrance Hole: Great, Blue, Marsh and Coal Tits, House and Tree Sparrows, Nuthatch, Redstart and Pied Flycatcher.
