Notes

- This drawing has been provided for information only and has been produced to give an overview the extent of existing known services which require disconnection / diversion / protection as part of the demolition works.
- This drawing is to be read in conjunction with all utilities record plans and the buried utilities survey information - The contractor shall familiarise themselves with the findings of the GPR & topographical survey information, in addition to up to date utilities services record drawings prior to commencing any works on site.
- All service routes and quantities shown are based on topographical & GPR survey information (provided 2023 by others), therefore are indicative and to be used for discussion/co-ordination purposes only - To be verified on site by the Contractor.
- Not all private services are shown on this drawing.
- All excavations must be hand dug.

Route of existing buried water main through site shall not be affected by demolition works on the basis the scope of demolition is limited to above ground floor slab elements
