

NOTICE OF PLANNING PERMISSION

Town and Country Planning Act 1990 Town and Country Planning (Development Management Procedure) (England) Order 2015

To:

Mr Steven Hartley
HP&DA Ltd
Swallow Barn
Lower Chapel Hill
Hurst Lane
Rawtenstall
BB4 8TB

On Behalf Of:

Mr Jason Briggs
Kirklees Valley Farm
Lower Kirklees Street
Tottington
Bury
BL8 3NY

PART 1 - Particulars of Application

Application Number: 69555

Date of Registration: 13/04/2023

Proposal:

Erection of single storey dwelling to replace existing dwelling

Location:

Kirklees Valley Farm, Kirklees Street,
Tottington, Bury, BL8 3NY

PART 2 - Particulars of Decision

Bury Metropolitan Borough Council hereby give notice in pursuance of the provisions of the Town and Country Planning Act 1990 that permission has been **GRANTED** for the carrying out of the development referred to in Part 1 hereof in accordance with the application and plans submitted subject to the following conditions:-

- 1 The development must be begun not later than three years beginning with the date of this permission.
Reason. Required to be imposed by Section 91 Town & Country Planning Act 1990.
- 2 This decision relates to drawings - Existing site plan and proposed sections JB-17-05-23-A2; Proposed site plan and building section JB-17-05-23-B(2) amended 5/6/23; Location plan JB-210920 and the development shall not be carried out except in accordance with the drawings hereby approved.
Reason. For the avoidance of doubt and to ensure a satisfactory standard of design pursuant to the policies of the Bury Unitary Development Plan listed.
- 3 Within 2 months of the re-siting of the dwelling to the approved position, the structures shown hatched in grey and the former dwelling subject of the Lawful Development Certificate as shown on the existing site plan and proposed sections plan JB-17-05-23-A2 shall permanently be removed from site and the land re-instated to a grassed surfacing within 12 months or the first available planting season, which shall thereafter be maintained.
Reason. The application is considered acceptable subject to the removal of existing structures to maintain the openness and character of the Green Belt pursuant to Bury Unitary Development Plan Policies OL1/2, EN1/1, EN9/1 and the principles of

the NPPF.

- 4 Following the re-siting of the dwelling hereby approved, connection shall be made to the existing septic tank.
Reason. To ensure suitable drainage of the site pursuant to UDP Policy EN7/5 - waste Water Management and the principles of the NPPF.
- 5 No works to trees or shrubs shall occur or demolition commence between the 1st March and 31st August in any year unless a detailed bird nest survey by a suitably experienced ecologist has been carried out immediately prior to clearance and written confirmation provided that no active bird nests are present which has been agreed in writing by the Local Planning Authority.
Reason. In order to ensure that no harm is caused to a Protected Species pursuant to policies EN6 - Conservation of the Natural Environment and EN6/3 - Features of Ecological Value of the Bury Unitary Development Plan and National Planning Policy Framework Section 15 - Conserving and enhancing the natural environment.
- 6 Prior to the occupation of the development hereby approved, details of the proposed landscaping plan shall be submitted to and approved by the Local Planning Authority. The contents of the plan should include native tree and shrub planting and the provision of bat/bird boxes. The approved scheme shall thereafter be implemented not later than 12 months from the date the dwelling is first occupied or within the first available tree planting season,; and any trees or shrubs removed, dying or becoming severely damaged or becoming severely diseased within five years of planting shall be replaced by trees or shrubs of a similar size or species to those originally required to be planted.
Reason. To secure the satisfactory development of the site and in the interests of visual amenity pursuant to Policies H2/2 - The Layout of New Residential Development, EN1/2 - Townscape and Built Design and EN8/2 - Woodland and Tree Planting of the Bury Unitary Development Plan and chapter 15 - Conserving and enhancing the natural environment of the NPPF.
- 7 The vehicular and pedestrian access arrangements, turning facilities and bin storage/collection arrangements for the new dwelling within the curtilage of the site indicated on the approved plans shall be provided before the development is first occupied and the areas used for the manoeuvring of vehicles shall subsequently be maintained free of obstruction at all times.
Reason. In the interests of highway safety and to minimise the standing and turning movements of vehicles on the highway in the interests of road safety pursuant to bury Unitary Development Plan Policies EN1/2 - Townscape and Built design and H2/2 the Layout of New Residential Development.
- 8 The car parking for the new dwelling indicated on the approved plans, shall be surfaced and made available for use prior to the development hereby approved being occupied and thereafter maintained at all times.
Reason. To ensure adequate off-street car parking and to allow adequate space to maintain a vehicle clear of the highway in the interests of road safety pursuant to policy HT2/4 - Car Parking and New Development of the Bury Unitary Development Plan.
- 9 Prior to first occupation of the development hereby approved, a sprinkler/misting system to meet the requirements of BS 9251:2014 or other subsequent standard that meets the requirements of Greater Manchester Fire and Rescue Service and deemed suitable to overcome the site's emergency access deficiencies, shall be installed in the dwelling hereby approved and shall thereafter be maintained at all times.

Reason. In the interests of fire safety and to ensure the safe and satisfactory development of the site and for its future occupiers pursuant to Bury Unitary Development Plan Policies H1/2 - Further Housing Development, H2/2 - The Layout of New Residential Development and EN1/2 - Townscape and Built Design.

- 10 Notwithstanding the terms of the Town and Country Planning (General Permitted Development) (England) Order 2015, as subsequently amended, no development shall be carried out within the terms of Classes A to G of Part 1 and Class A of Part 2 of Schedule 2 of the Order, without the submission and approval of a relevant planning application.

Reason. To ensure that future inappropriate alterations or extensions do not occur pursuant to policies of the Unitary Development Plan listed.

Statement in accordance with Article 35(2) Town and Country Planning (Development Management Procedure) (England) (Amendment) Order 2015

The Local Planning Authority worked positively and proactively with the applicant to identify various solutions during the application process to ensure that the proposal comprised sustainable development and would improve the economic, social and environmental conditions of the area and would accord with the development plan. These were incorporated into the scheme and/or have been secured by planning condition. The Local Planning Authority has therefore implemented the requirement in Paragraph 38 of the National Planning Policy Framework.

The following policies of the Bury Unitary Development Plan, National and Regional Government were considered relevant:

NPPF	National Planning Policy Framework
EN1/1	EN1/1 - Visual Amenity
EN1/2	EN1/2 - Townscape and Built Design
EN1/3	EN1/3 - Landscaping Provision
EN6	EN6 - Conservation of the Natural Environment
EN6/3	EN6/3 - Features of Ecological Value
EN8	EN8 - Woodland and Trees
EN8/2	EN8/2 - Woodland and Tree Planting
OL1/2	OL1/2 - New Buildings in the Green Belt
OL5/2	OL5/2 - Development in River Valleys
HT2/4	HT2/4 - Car Parking and New Development
EN6/4	EN6/4 - Wildlife Links and Corridors
SPD8	Development Control Policy Guidance Note 8 - New Buildings and Associated Development in the Green Belt
RT3/2	RT3/2 - Additional Provision for Recreation in the Countryside
EN7/5	EN7/5 - Waste Water Management
H1/2	H1/2 - Further Housing Development
H2/1	H2/1 - The Form of New Residential Development
H2/2	H2/2 - The Layout of New Residential Development

This decision relates only to the Town and Country Planning Acts and does not include any consent or approval under any other enactment or under the Building Regulations. Any other consent or approval which is necessary must be obtained from the appropriate authority.

Applicant Plan Numbers:

Existing site plan and proposed sections JB-17-05-23-A2; Proposed site plan and building section JB-17-05-23-B(2) amended 5/6/23; Location plan JB-210920

NOTES TO APPLICANT

United Utilities wish to make the following comments regarding the proposal detailed above.

UNITED UTILITIES PROPERTY, ASSETS AND INFRASTRUCTURE

Where United Utilities' assets cross the proposed red line boundary, developers must contact our Developer Services team prior to commencing any works on site, including trial holes, groundworks or demolition. Please see 'Contacts' section below.

Water pipelines

United Utilities will not allow building over or in close proximity to a water main.

Wastewater pipelines

United Utilities will not allow a new building to be erected over or in close proximity to a public sewer or any other wastewater pipeline. This will only be reviewed in exceptional circumstances.

Nb. Proposals to extend domestic properties either above, or in close proximity to a public sewer will be reviewed on a case by case basis by either by a building control professional or following a direct application to United Utilities (see our website for further details).

Important information regarding water and wastewater pipelines and apparatus

It is the applicant's responsibility to investigate and demonstrate the exact relationship between United Utilities' assets and the proposed development.

A number of providers offer a paid for mapping service, including United Utilities (see 'Contacts' section below). The position of the underground apparatus shown on water and wastewater asset maps is approximate only and is given in accordance with the best information currently available. Therefore, we strongly recommend the applicant, or any future developer, does not rely solely on the asset maps to inform decisions relating to the detail of their site and instead investigates the precise location of any underground pipelines and apparatus. Where additional information is requested to enable an assessment of the proximity of proposed development features to United Utilities assets, the proven location of pipelines should be confirmed by site survey; an extract of asset maps will not suffice. The applicant should seek advice from our Developer Services team on this matter. See 'Contacts' Section below. United Utilities Water will not accept liability for any loss or damage caused by the actual position of our assets and infrastructure being different from those shown on asset maps.

Developer's should investigate the existence and the precise location of water and wastewater pipelines as soon as possible as this could significantly impact the preferred site layout and/or diversion of the asset(s) may be required. Unless there is specific provision within the title of the property or an associated easement, any necessary disconnection or diversion of assets to accommodate development, will be at the applicant/developer's expense. In some circumstances, usually related to the size and nature of the assets impacted by proposals, developers may discover the cost of diversion is prohibitive in the context of their development scheme.

Any agreement to divert our underground assets will be subject to a diversion application, made directly to United Utilities. This is a separate matter to the determination of a planning application. We will not guarantee, or infer acceptance of, a proposed diversion through the planning process (where diversion is indicated on submitted plans). In the event that an application to divert or abandon underground assets is submitted to United Utilities and subsequently rejected (either before or after the determination of a planning application), applicants should be aware that they may need to amend their proposed layout to accommodate United Utilities' assets.

Where United Utilities' assets exist, the level of cover to United Utilities pipelines and apparatus must not be compromised either during or after construction and there should be no additional load bearing capacity on pipelines without prior agreement from United Utilities. This would include sustainable drainage features, earth movement and the transport and position of construction equipment and vehicles.

Any construction activities in the vicinity of United Utilities' assets, including any assets or infrastructure that may be located outside the applicant's red line boundary, must comply with national building and construction standards and where applicable, our 'Standard Conditions for Works Adjacent to Pipelines', a copy of which is available on our website. The applicant, and/or any subsequent developer should note that our 'Standard Conditions' guidance applies to any design and construction activities in close proximity to water pipelines and apparatus that are no longer in service, as well as pipelines and apparatus that are currently operational. It is the applicant's responsibility to ensure that United Utilities' required access is provided within any proposed layout and that our infrastructure is appropriately protected. The developer would be liable for the cost of any damage to United Utilities' assets resulting from their activity.

DRAINAGE

National Planning Policy Framework (NPPF) and the National Planning Practice Guidance (NPPG) advise that surface water from new developments should be investigated and delivered in the following order of priority:

1. into the ground (infiltration);
2. to a surface water body;
3. to a surface water sewer, highway drain, or another drainage system;
4. to a combined sewer.

The applicant should consider their drainage plans in accordance with the drainage hierarchy outlined above.

Please note, United Utilities is not responsible for advising on rates of discharge to the local watercourse system. This is a matter for discussion with the Lead Local Flood Authority and / or the Environment Agency (if the watercourse is classified as main river).

In the event that the applicant, or any subsequent developer, approaches United Utilities regarding a connection for surface water to the public sewer, it is likely that we will request evidence that the drainage hierarchy has been fully investigated and why more sustainable options are not achievable. This will be managed through either our 'S106 Sewer Connections' or 'S104 Adoptions' processes.

If the applicant intends to offer wastewater assets forward for adoption by United Utilities, their proposed detailed design will be subject to a technical appraisal by our Developer Services team and must meet the requirements outlined in 'Sewerage Sector Guidance Appendix C – Design and Construction Guidance v2-2' dated 29 June 2022 or any subsequent iteration. This is important as drainage design can be a key determining factor of site levels and layout.

The applicant should not presume that the principles outlined within a drainage strategy will meet the detailed requirements for a successful adoption application. We strongly recommend that no construction commences until the detailed drainage design, has been assessed and accepted in writing by United Utilities. Any works carried out prior to the technical assessment being approved is done entirely at the developers own risk and could be subject to change.

WATER AND WASTEWATER SERVICES

If the applicant intends to receive water and/or wastewater services from United Utilities they should visit our website or contact the Developer Services team for advice at the earliest opportunity. This includes seeking confirmation of the required metering arrangements for the proposed development. See 'Contacts' Section below.

If the proposed development site benefits from existing water and wastewater connections, the applicant should not assume that the connection(s) will be suitable for the new proposal or that any existing metering arrangements will suffice. In addition, if reinforcement of the water network is required to meet potential demand, this could be a significant project and the design and construction period should be accounted for.

In some circumstances we may require a compulsory meter is fitted. For detailed guidance on whether the development will require a compulsory meter please visit

<https://www.unitedutilities.com/my-account/your-bill/our-household-charges-20212022/> and go to section 7.7 for compulsory metering.

To promote sustainable development United Utilities offers a reduction in infrastructure charges for applicant's delivering water efficient homes and draining surface water sustainably (criteria applies). For further information, we strongly recommend the applicant visits our website when considering any water or wastewater design

<https://www.unitedutilities.com/builders-developers/your-development/planning/building-sustainable-homes/>

Business customers can find additional information on our sustainable drainage incentive scheme at

<https://www.unitedutilities.com/Business-services/retailers/incentive-schemes/>

To avoid any unnecessary costs and delays being incurred by the applicant or any subsequent developer, we strongly recommend the applicant seeks advice regarding water and wastewater services, and metering arrangements, at the earliest opportunity. Please see 'Contacts' Section below.

CONTACTS

Website

For detailed guidance on water and wastewater services, including application forms and the opportunity to talk to the Developer Services team using the 'Live Chat' function, please visit: <http://www.unitedutilities.com/builders-developers.aspx>

Email

For advice on water and wastewater services or to discuss proposals near to pipelines, email the Developer Services team as follows:

Water mains and water supply, including metering -

DeveloperServicesWater@uuplc.co.uk

Public sewers and drainage - WastewaterDeveloperServices@uuplc.co.uk

Telephone - 0345 072 6067

Property Searches (for asset maps):

A number of providers offer a paid for mapping service including United Utilities. For more information, or to purchase a sewer and water plan from United Utilities, please visit <https://www.unitedutilities.com/property-searches/>

Water and sewer records can be viewed for free at our Warrington Head Office by calling 0370 751 0101. Appointments must be made in advance. Public sewer records can be viewed at local authority offices. Arrangements should be made directly with the local authority.

Whilst the building to be demolished is very low risk for bats, the applicant is

reminded that under the 2019 Regulations it is an offence to disturb, harm or kill bats. If a bat is found during demolition all work should cease immediately and a suitably licensed bat worker employed to assess how best to safeguard the bat(s). Natural England should also be informed.

This recommendation relates to the revised plan received by this section on 5 June 2023.

The applicant must be made aware of the need to safeguard people using public rights of way and that no public rights of way are damaged, widths altered, gates erected across their width (unless authorised by Bury Council the Highway Authority) or obstructed by any other means either during or as a result of development. The applicant must ensure that no changes to land levels/surface water runoff affects a public right of way. If a temporary obstruction of public rights of way is unavoidable, no development must take place until a temporary closure order has been made by Bury Council and a suitable temporary alternative route(s) made available.

The applicant's attention is drawn to the existence of Public Right of Way No. 52, Tottington, which forms the access to and abuts the site. No development should take place which affects the Right of Way in the absence of an appropriate closure or diversion order

The full details of a scheme of mitigation measures required by Greater Manchester Fire and Rescue Service to overcome the site's emergency access deficiencies should be discussed with the fire service. The details/measures should incorporate the installation of a residential sprinkler/misting system in the dwelling to current appropriate standards as conditioned, as well as ensure that the recognised Approved Document requirements for Fire Service access will be met:

- Vehicular access for a fire appliance to within 45m of all points within the dwelling;
- The access road should be a minimum width of 4.5m and capable of carrying 12.5 tonnes;
- As the access road is more than 20m long, a turning circle, hammerhead, or other turning point for fire appliances will be required;
- There should be a suitable fire hydrant within 165m of the dwelling.

The details/measures subsequently agreed should be implemented to the satisfaction of GMFRS before the dwelling is first occupied and thereafter maintained at all times.

The applicant's attention is drawn to the need to consult the Department of Operations regarding the specification for and implementation of any highway remedial works that may be necessary as a result of the construction of the proposed development. The cost of the works will be the responsibility of the applicant.

The Council currently operates a curtilage system of refuse collection. The applicant is advised to liaise with Waste Management, Bradley Fold Depot on 0161 253 6621/7010, regarding the operation of this system

Signed:
