About Solar Fast

Solar Fast has helped 1,000s of people save on their Energy Bills. We also help people, just like you, get a Solar Panel System installed at the best price.

Solar Fast have partnered with top solar energy industry organisations and bodies to ensure that our work is the finest, most professional that you can find. We value old-fashioned workmanship and integrity.

After we built Gas Fast, a nationwide-recognised boiler installation company in 2001, it was becoming ever-clearer that people were missing out on the potential solar energy.

Fast forward to 2022, Solar Fast is becoming one of the biggest solar panel installers in the UK . trusted by 1,000s of customers across the country, on a mission to stamp out fossil fuels and save on energy bills.

Our Goals

1. Help You Save Money

Our top priority is to help you save money on energy. Energy prices are rising rapidly - Solar Panels are one of the best solutions to save money and increase the value of your home.

2. Save The Planet

It's clear to see that fossil fuels are damaging our planet. Solar Panels and other renewable energy sources protect the environment and cut carbon emissions.

3. Offer Best Value

It's clear to see that fossil fuels are damaging our planet. Solar Panels and other renewable energy sources protect the environment and cut carbon emissions.

Your New System

Product	Quantity
Trina Vertex 395w Panels	6
Trina Vertex 395w Panels	6
PV on Roof and Hazard Labels Pack	1
DC cable	1
Installation	1
A/C Isolator 32A	1
24 Month Workmanship Warranty	1
3D Model Design	1
HIES Warranty	1
EPVS Validation	1
Scaffolding	2
Panel Installation	1
Electrical connections	1
D/C 80A isolator	1
Generation Meter	1
MCS Building control Registration	1
Lux 3600 3.6 kw Hybrid Inverter	1
Greenlinx 3.2 Kwh Battery	2

Total Price: £11,995.00

Savings

Full savings potential of the system.

Annual Generation

3,093.0_{kWh/py}

Year 1 Savings

Solar:
£446.95

Battery:
£357.56

Total:
£804.51

Average Annual Benefit

Solar:
£1,045.54

Battery:
£704.30

Total:
£1,749.84

Lifetime Benefit

Solar: £26,138.41

Battery: £17,607.52

Total: £44,810.84

1. The annual benefit values are calculated as an average from the total 25 year guaranteed life of the system.
2. The lifetime benefit values are calculated with the inclusions of inverter, battery and any bolt-on replacement costs as per EPVS guidelines.

MCS Compliance Information

To ensure we are MCS compliant, we offer the following information for complete transparency.

The performance of solar PV systems are impossible to predict with absolute certainty due to the variability in the amount of solar radiation (sunlight) from location to location and from year to year. This estimate is based upon the standard MCS procedure and is given as guidance only. It should not be considered as a guarantee of performance.

This system performance calculation has been undertaken using estimated values for array orientation, inclination or shading. Actual performance may be significantly lower or higher if the characteristics of the installed system vary from the estimated values.

This shade assessment has been undertaken using the standard MCS procedure - it is estimated that this method will yield results within 10% of the actual annual energy yield for most systems.

Our Reviews

Trusted by **1,000s** of UK homeowners

"Got in touch with Solar Fast in January, they have been outstanding from start to finish. One of their sales people, Gavin, was extremely helpful and answered all of our questions.

My wife and I are over the moon with our solar panels! We had the black ones installed and they look great on the roof. We've also seen a massive decrease in our energy bills. Our battery is storing so much excess energy we're thinking of changing the jag for a tesla so we can save even more (especially with fuel prices now!).

Top work from the solar fast team! 10/10 would recommend!"

Julian Harthill, Leeds

Terms and Conditions

The prices quoted are fixed for thirty days from the date of quotation. Upon signing, this will form a legally binding contract between Gas Fast Ltd, trading as Solar Fast, and you the customer. We will endeavour to complete installation within 4 weeks of receipt of contract and payment, a full installation schedule will be agreed with you upon completion of remote / site survey.

1. Reference in these terms and conditions to Solar Fast / 'we' are references to Gas Fast Ltd, trading as Solar Fast, whose registered office is at: Unit 1 Savile Road, Castleford, West Yorkshire, England, WF10 1PE.
2. Reference to the customer is reference to whom the quotation is addressed and will be referred to as you / you.
3. The quotation is subject to availability of equipment and materials
4. Access into your premises and loft may be required in order to undertake and or complete the installation.
5. A deposit may be payable on acceptance of the quotation. Solar Fast will request no more than a maximum deposit of 25% of the total contract cost. Advance payments may not exceed 60% of the total contract cost, including any deposit amounts.
6. Solar Fast will make all reasonable efforts to start and complete the work as agreed; but cannot accept liability for major delays beyond our control. In the unlikely event that Solar Fast must cancel the scheduled installation date, an alternative mutually convenient date will be offered. In the case of delays in the delivery of goods, then you may be offered products of equivalent specification, value and quality that are MCS certified. You have the right to accept the offer or wait for products that were originally ordered.
7. You are responsible for obtaining any Planning Consents / Permissions that may be required before the work commences. This is typically required if your property is listed or in a conservation area, or area of outstanding natural beauty.
8. The quotation includes the supply and installation of all components and materials required to carry out the work and include VAT at the current rate unless otherwise stated.
9. Unless otherwise stated, the quotation includes materials required to work and access to the relevant areas of the property. Our warranty is restricted to only the materials and appliances installed by, or on behalf of Solar Fast.
10. Additional items such as boiler managers, hot water controllers and smart thermostats may be offered for free as a promotion. In the event that these items are non-compatible with the customers existing boiler/system, there will be no reduction in cost to the main solar system.
11. Solar Fast warrants the installations for two years, from the date of installation. Extended warranty beyond two years can be purchased before the expiry. The warranty does not cover acts of vandalism, third party negligence, 'acts of God' (an instance of uncontrollable natural forces) or wilful damage.
12. If the final system design is distinctly different from what was agreed and set out in the quotation survey, then Solar Fast may seek a 'Variation to Order' from the customer.
13. Should you delay the installation of this contract for any reason(s) or require additional work or changes to the contract which may cause delay, you may be required to pay reasonable compensation to cover any additional costs which may have arisen.
14. Not applicable to finance customers: The balance outstanding on the contract price is due on completion and commissioning of the installation. You will not be entitled, due to any alleged minor defect, to withhold more than a proportionate amount of the outstanding balance. If you do withhold any amount after the due date, because of any alleged minor defect, you must give us notice before the final date on which payment is due. In that notice, you must also state the reason(s) you are withholding payment.
15. If you fail to pay the amount specified in an invoice by the due date, then we may charge interest until the full amount is paid. The interest rate we charge shall be 5% above the Bank of England base rate, or a flat 8% - whichever is higher.
16. Where a survey date, within the 2-week cancellation period has been agreed and carried out, but the order subsequently cancelled by the customer, a fee of £150 will be charged to cover the cost of the survey. If the order is cancelled by Solar Fast, due to the roof or home electrics system not being suitable, the survey fee will not be charged.
17. Any internal cable run(s) shall be routed in suitable containment and kept out of sight where possible. Chasing into walls/running underneath the floorboards does not form part of our standard installation and must be requested, quoted, and agreed, in writing, prior to the installation. This also applies to groundwork for ground mount systems.
18. The Validation Sheet that has been provided to you separately in respect of your purchase forms part of the agreement between us (Gas Fast Ltd t/a Solar Fast) and together the Validation Sheet and this (a) agreement constitute the entire agreement ('Renewable Energy Contract') between us and supersedes and extinguishes all previous agreements, promises, assurances, warranties, representations and understandings between us, whether written or oral, relating to its subject matter. (b) Each party acknowledges that in entering into this Renewable Energy Contract, it does not rely on, and shall have no remedies in respect of, any statement, representation, assurance or warranty (whether made innocently or negligently) that is not set out in this Renewable Energy Contract, but this does not affect your rights and our liability in relation to any fraud or fraudulent misrepresentation for which we are responsible. (c) Each party agrees that it shall have no claim for innocent or negligent misrepresentation or negligent misstatement based on any statement in this Renewable Energy Contract.
19. Average savings are calculated taking into consideration the interest, total benefit less the system cost; and then divided by the system life cycle of 25 years.
20. The export tariff figures are calculated based on 10% of the annual generation. The export tariff must be opted in for by the customer to an energy provider that allows for the scheme. Export tariff is not guaranteed. Solar Fast have calculated the unit at the rate of 5p per sold unit, in line with EPVS guidelines.
21. It is the customers responsibility to provide adequate internet connectivity. In the unlikely event that the customers internet connection is not strong enough or compatible with the products we are installing, full payment will still be required upon completion. Once the customers connectivity issues are resolved, Solar Fast will reattend free of charge to connect the devices to the monitoring system.
22. If, for any reason(s), you have cause for complaint, please see our process below to help quickly resolve any issues:
 1. Please email your complaint to contact@solarfast.co.uk - allowing up to 5 working days for a full reply and actions.
 2. We must be allowed to assess the complaint and remedy any issue at the earliest opportunity.
 3. If, for any reason(s), we cannot resolve the issue, you should contact HIES, who will independently assess and mediate where required.
 4. If the issue remains unresolved following the outcome of the mediation, the customer is within their consumer rights to register their complaint with the Ombudsman

Payment Terms | We require payment to terms. Payment must be made on time, in full, and without any deduction, set off or counterclaim. In the event that an account is outstanding, we will refer the matter to our debt collection agents, Daniels Silverman Limited, which will incur additional costs. The additional costs incurred to collect the debt will be added to the debt, plus VAT at the prevailing rate. You agree that you will be legally liable to pay the outstanding account, plus additional costs, and that payment of the same can be enforced against you in court. If applicable, you also agree to pay compensation and interest, at the relevant reference rate, as provided for under the Late Payment of Commercial Debts (Interest) Act 1998.

Changing Your Mind | You have the right to change your mind and cancel the contract within 14 days from the date of completion of your installation without giving any reason. This does not apply to the extent that the contract includes emergency works. To change your mind and cancel the contract accordance with the above clause, you should tell us as quickly as possible and confirm this in writing to contact@solarfast.co.uk. You should think carefully about the consequences of cancelling the contract at different stages; however, you may change your mind and cancel the contract from the commencement date to 14 days after the date of your completion of your installation. This is over and above your statutory rights. If no goods have been provided or services carried out (including any preparatory work), you may change your mind and cancel the contract; in which case you will receive a full refund of any monies paid within a further 14 days. If we have commenced with the provision of the services (including any preparatory work) on the contract, you may change your mind and cancel the contract; however, we may charge you reasonable fees; provided: (a) It is a reasonable reflection of the value of the work that has been carried out; and (b) you gave us permission (by agreeing to this contract) to proceed within the cancellation period. If we have completed (or partially completed) an installation, you should think carefully about the consequences of cancelling the contract at this stage. We will return to your property to remove the goods and you must allow us to do so. You should plan carefully for this. We will carefully remove the goods and leave your property safe, secure, and watertight. It is likely to be impossible to refit your old goods back into the property and we are under no obligation to do so; however, we will ensure that any gas or water pipes are safely capped off and your property boarded up or sealed, so that it is temporarily protected from bad weather. We will charge you reasonable fees for the work done so far and the reduced value of the goods. If the work has been completed, this could mean that you are charged a significant proportion of the agreed price.

If at the point of calculating your savings, you are unable to provide Solar Fast with an up to date bill, our system will generate a Unit Rate Statement document that shows estimations of typical unit rates based on current tariffs available. By signing this contract, you agree and accept that the unit rate and consumption stated are based on estimations. A copy of this document will be sent to you digitally along with your contract.

If at the point of sale, your consumption is less than the estimated generation of the new system to be installed, an Oversized System Statement will be generated to show that you are happy to proceed based on your generation being more than your current consumption and the savings associated with your design would not be entirely usable by you, the customer, unless your consumption increases. By signing this contract, you agree and accept to the above statement. A copy of this document will be sent to you digitally along with your contract.
