The site is within Flood Risk Zone 1 which is considered to be at the lowest risk of flooding as a result of fluvial water.

The site access road which serves the site has been identified as being subject to a High Risk of surface water flooding. Flash floods happens when heavy rain cannot drain away and are difficult to predict as it depends on rainfall volume and location. However, the area where the flat is situated is not identified as being at risk of surface water flooding.

A flood risk assessment should accompany the application where the site:

- is in Flood Zones 2 or 3; or
- is in an area with critical drainage problems (such areas will have been notified to the Local Planning Authority by the Environment Agency).

[Check if your site location is in Flood Zone 2 or 3 online](#)
