Biodiversity and Geological Conservation

To assist in answering this question correctly, please refer to the help text which provides guidance on determining if any important biodiversity or geological conservation features may be present or nearby; and whether they are likely to be affected by the proposals.

Supporting information requirements

Where a development proposal is likely to affect features of biodiversity or geological conservation interest, you will need to submit, with the application, sufficient information and assessments to allow the local planning authority to determine the proposal.

Failure to submit all information required will result in your application being deemed invalid. It will not be considered valid until all information required by the local planning authority has been submitted.

Your local planning authority will be able to advise on the content of any assessments that may be required.

Biodiversity net gain

Biodiversity net gain is a legal requirement for planning permission introduced on 12 February 2024. All applications are required to either provide detailed information proving there will be a biodiversity increase; or explain why they are exempt from doing so.

[Find out more about biodiversity net gain, and access digital tools from our partners that can help determine if you are exempt, or produce the biodiversity metric information required.](#)

Do you believe that, if the development is granted permission, the general Biodiversity Gain Condition (as set out in Paragraph 13 of Schedule 7A of the Town and Country Planning Act 1990 (as amended)) would apply?

- ☐ Yes
☒ No

Please add all the exemptions or transitional arrangements that apply and provide a reason why

Exemption:

Development subject to the de minimis exemption (development below the threshold)

Reason for selecting exemption:

The property, as dwellinghouse, has only a rear yard that is hard surfaced (please refer to figures in supporting statement). It is devoid of any vegetation. The property has no existing biodiversity and the development is principally one of a change of use, with minor operational development. Consequently this is a small scale development that will not impact habitat.

Note: Please read the help text for further information on the exemptions available and when they apply

☒ Yes

☐ No

If Yes, please provide details:

Bins will be stored at the rear of the dwellinghouse per plan 999-LP, brought out onto the high on the collection day and returned to the store. This will preserve, if not improve, the street's visual amenity.

Have arrangements been made for the separate storage and collection of recyclable waste?

☐ Yes

☒ No
