RP.

In the event the site has to be closed the following will take place.

The poultry houses will be emptied of chickens

Carcasses will all be removed of site

The manure will be removed off site

The houses will be washed down and disinfected

The houses will be closed up and locked

The biomass boilers will be shut down after the stores are emptied

Any fuel will be removed by an authorised party

The slurry/dirty water tank will be emptied by an authorised person

During this time all relevant authorities will be informed of the closure and the full details of the reason for the closure.
