Biomass Boilers

Relevant information regarding boilers

Permit DP3931

There are 5 biomass boilers on site.

One is situated next to the container building to the right of shed 1.

This feeds sheds 1 and 2 and the pellet store is a bulk bin next to it on a hard standing.

2 are situated in one concrete building next to shed number 4.

This feeds sheds 3 and 4 and has some exterior pipes and chimneys.

The store for wood pellets or virgin wood chip is stored behind the boilers to feed the two sheds for heating.

2 are situated in one concrete building next to shed number 5.

This feeds sheds 5 and 6 and has some exterior pipes and chimneys.

The store for wood pellets or virgin wood chip is stored behind the boilers to feed the two sheds for heating.

The ash from all the boilers is put in the sheds on the manure when cold at end of crop and removed off site.

The boilers are serviced and maintained regularly regardless of the amount of hours they have been running.

BSL numbers are kept for all deliveries of fuel and all RHI conditions are met.
