

Comments from GMP Crime Prevention Team.

- Lighting should be provided to the area around the proposed ATM to an adequate and uniform level, so as not to allow any areas of pooling/shadowing.
- Defensible space ground markings (e.g. 1m² painted area, change in surface texture, metal studs within paving etc.) should be employed and maintained at the front of the ATM to indicate that only one user at a time may enter the space.
- The proposed ATM should be protected by a closed circuit television system that should view the area and the users of the ATM, but not the ATM keypad itself.
- Replenishment of the ATM should be carried out from a secure area inside the host building / while the public are excluded from the building. A dedicated parking area should be provided for the cash-in-transit vehicle within the immediately vicinity of the ATM.
- The ATM itself must be securely anchored, alarmed and should include a banknote degradation system or similar.
