

Biodiversity gain plan

Submit a biodiversity gain plan to show how your development will achieve biodiversity net gain.

When to use this form

A biodiversity gain plan shows how a development will achieve 10% biodiversity net gain (BNG). Submit this form to your local planning authority after they approve your planning application.

Unless your development is exempt, you cannot start the development until the LPA approves your biodiversity gain plan and biodiversity metric calculation tool.

1. Submission details

1.1 Date

For example, 3/11/2023

21/05/2026

1.2 Planning application reference number

71834

1.3 Local planning authority (LPA)

Bury Council

1.4 Development site address

If the site does not have an address, enter the OS grid reference.

Duke Street, Bury, BL9 0EJ

1.5 Describe the development

Tell us about the proposed development and any changes of use (250 words).

Infill of the existing underpass, engineering works (including remediation works; foundation/piling works; and other associated engineering works) to recontour the land within Pyramid Park to tie into existing levels, the construction of a fully accessible pedestrian bridge structure (including alterations to Metrolink-related infrastructure) across the existing Metrolink line to allow access between Knowsley Place, the Metrolink platform (via lift and stairs) and Pyramid Park; improvements to the existing Metrolink platforms and canopies; construction of a new sloped footpath with stairs within Pyramid Park site from bridge; hard/soft landscaping; and associated drainage and lighting schemes.

2. Developer details

2.1 Applicant name

Helen Webster

2.2 Company name

Transport for Greater Manchester

2.3 Address

2 Piccadilly Place, Manchester M1 3BG

2.4 Email address

helen.webster@tfgm.com

2.5 Telephone number

07775 002066

2.6 Declaration

By signing this declaration, you confirm that the information you give is complete and correct. Any opinions are your genuine opinions.

2.7 Signature

H. Webster

2.8 Date

22.05.26

3. Responsible person details

Tell us about who is responsible for completing the biodiversity gain plan. For example, a consultancy ecologist or planning agent.

3.1 Name

Emma Hickson

3.2 Company name

The Environment Partnership (TEP)

3.3 Address

Birchwood Park, 401 Faraday Street, Risley, Warrington,
WA3 6GA

3.4 Email address

EmmaHickson@tep.uk.com

3.5 Telephone number

07760 788737

3.6 Declaration

3.7 Signature

E. Hickson

3.8 Date

21/05/2026

4. Biodiversity net gain strategy

4.1 Is the relevant date for the pre-development biodiversity value the same date as the planning application?

☒ Yes

☐ No

4.2 If no, what earlier date did you agree with the LPA?

N/A

4.3 How have you met the guidance on 'what counts towards your BNG'?

[Find out what you can count towards a development's BNG](#)

BNG has been met through inclusion of habitat creation included in the landscape masterplan (16102-OOB-ZZZ-ZZZ-D-LA-000001).

4.4 How will you avoid or minimise impacts to habitats?

Tell us about the steps you've taken on site, including to avoid or minimise the impact on irreplaceable habitats.

The site does not contain any irreplaceable habitats. The site contains habitats of medium low and very low distinctiveness. 0.40ha of the overall 1.03ha of the site will be retained, and a further 0.13 ha will be enhanced, totalling 51% of the overall site area being retained and or enhanced.

Impacts on retained habitats, particularly trees, scrub and woodland, will be minimised in accordance with protection measures set out in the current standards (BS 5837:2012 Trees in relation to design, demolition and construction – recommendations). These measures will minimise incidental damage and disturbance to the habitats and the species they support.

In addition, a Construction Environmental Management Plan (CEMP) will deliver avoidance and control measures which will minimise impacts on retained habitats, such

as drip trays to prevent any oil and fuel spillages spreading, use of wheel washing and damping down to minimise the incidence of windblown dust, and net fencing to catch windblown rubbish.

4.5 Did you use your local nature recovery strategy to inform the strategic significance of habitats?

This includes other specified strategies if you do not have a local nature recovery strategy.

☒ Yes

☐ No

4.6 How will you achieve the target net gain percentage?

☐ On-site

☐ Off-site

☒ Both

4.7 Are any of your on-site enhancements considered 'significant'?

[Find out what counts as a significant on-site enhancement.](#)

☒ Yes

☐ No

4.8 If yes, tell us about the significant on-site enhancements

Include the appropriate planning condition or how you've secured the habitat.

Enhancements to be provided within the post-development proposals include:

- 0.34ha of bramble scrub enhanced to mixed scrub, moderate condition; and
- 0.03ha of introduced shrub to be enhanced to mixed scrub, poor condition.

Conditions of the planning approval will require this BGP and a Habitat Management & Monitoring Plan to be submitted and approved by the LPA to secure landscaping and BNG.

4.9 How many off-site biodiversity units do you need to meet 10% net gain?

0.06

4.10 Explain why you're using off-site biodiversity units

Only answer this question if you're planning to use off-site biodiversity units (250 words).

In this particular case, we are unable to create or restore on-site biodiversity features due to the nature of the habitat we are working with, and the limited space available on site. The majority loss of habitat on the site is a medium-distinctiveness woodland, which given the lack of space available on site cannot be easily replaced within the landscape masterplan.

Therefore, the most effective solution is to purchase off-site biodiversity units. These units will support the restoration and enhancement of similar woodland habitats within the local planning area. This approach ensures that the overall biodiversity value within the area will be maintained, while also complying with regulatory requirements for biodiversity net gain.

4.11 Explain why you're planning to use statutory biodiversity credits

Only answer this question if you're planning to use statutory biodiversity credits (250 words).

N/A

4.12 Do you have a habitat management and monitoring plan?

- ☒ Yes
☐ No

4.13 Have you used the statutory biodiversity metric tool?

- ☒ Yes
☐ No

4.14 Biodiversity metric calculation

Send your biodiversity metric calculation to the LPA and enter the file name.

B-BURY2506-MST-V01

4.15 Condition assessments

Send your condition assessments to the LPA and enter the file name.

X10850.001

4.16 Pre-development habitat survey report and map

Send your baseline habitat survey report and map to the LPA. Enter the file name.

Habitat Survey Report (16012-TEP-ZZZ-ZZZ-T-EN-00003 Ecological Impact Assessment (V2))
Baseline Map 16012-TEP-ZZZ-ZZZ-D-EN-000001

4.17 Post-development habitat map or landscape plan

Send your post-development habitat survey report and map to the LPA. Enter the file name.

Biodiversity Net Gain Assessment (16012-TEP-ZZZ-ZZZ-T-EN000005 BNGAssessment (V2))
Proposed Habitats Map 16012-ZZZ-ZZZ-D-EN-000003

4.18 Have you included an approved habitat degradation in the baseline?

If yes, include the relevant consenting body and reference number.

- ☐ Yes
☒ No

Consenting body

N/A

Reference number

N/A

5. Irreplaceable habitats

5.1 Does the development impact any irreplaceable habitats?

If yes, tell us if you've submitted an approved compensation plan.

☐ Yes

☒ No

5.2 Have you submitted an approved compensation plan?

☐ Yes

☒ No

6. On-site habitat enhancements

Answer this section if your development includes on-site habitat enhancements.

6.1 Survey date

For example, 3/11/2023

26/11/2024

6.2 Survey constraints

For example, access issues, weather, or seasonal constraints.

The habitat survey was undertaken outside of the optimal season. However, previous surveys have been undertaken across the site for the adjacent application, and a precautionary method for assigning condition assessments was applied.

6.3 Total pre-development biodiversity value

Enter the number from the headline results in your statutory biodiversity metric calculation.

Number of area habitat biodiversity units

4.31

Number of hedgerow biodiversity units

N/A

Number of watercourse biodiversity units

N/A

6.4 Total post-development biodiversity value

Enter the number from the headline results in your statutory biodiversity metric calculation.

Number of area habitat biodiversity units

4.68

Number of hedgerow biodiversity units

N/A

Number of watercourse biodiversity units

N/A

6.5 Total net change in biodiversity units

N/A

6.6 Will you register and allocate any biodiversity units from your site to other developments?

If yes or provisionally, give details.

☐ Yes

☒ No

6.7 Give details

Tell us about the amount of biodiversity units and the development location (250 words).

N/A

7. Off-site habitat enhancements

Answer this section if your development includes off-site habitat enhancements.

7.1 Tell us about the off-site habitat enhancements

Include whether you're delivering the off-site enhancements or buying biodiversity units.

The developer will purchase biodiversity units from the Environment Bank Limited (13489265) whose registered company address is at 35 Ballards Lane, London, England, N3 1XW.

7.2 Biodiversity gain site register reference number

BGS-130325001

7.3 How have you secured the off-site habitat enhancements?

Tell us about any responsible bodies and whether you've used an S106 or conservation covenant.

The Environment Bank secure units under a conservation covenant with RSK Biocensus (who act as the responsible body) and the developer will secure these from the Environment Bank via a S106 with the LPA.

7.4 Total baseline biodiversity value

Enter the number from the headline results in your statutory biodiversity metric calculation.
