Thank you for consulting TfGM in respect of Application 73256 which seeks approval for the construction of a car park, to facilitate the implementation of 8 electric vehicle charging bays and associated infrastructure, including CCTV and lighting.

The Technical Note supporting the application confirms the following:

- The existing vehicle access from Victoria Street will be utilised and upgraded. Tactile paving and dropped kerbs should be installed. Any redundant vehicle access points should be reinstated accordingly.
- The existing bus stop on Bolton Road will be unaffected. Should construction works be likely to impact upon the use of the bus stop temporarily, the applicant should be advised to liaise with stop.closures@tfgm.com prior to undertaking any works.

There are no other comments from a TfGM perspective.
