

Waste management response

Bin Storage location looks acceptable, however the size would need to be sufficient for the following capacity. This HMO would be entitled to the same capacity as a regular domestic 8 person household which would be 480 litres of general waste (2 x 240 litre bins) and 240 litres each of paper and card and comingled recycling (2 x 240 litre bins).

If there is any excess waste and the capacity is not sufficient then it is the responsibility of the landlord or managing agent to clear any excess waste that is generated and enter a commercial waste contract if necessary.
