

Condition 9 – Car Parking for Application No. 66142

A parking facility for one vehicle shall be made at the front (south facing side) of the property close to the existing bay window near the eastern perimeter.

A driveway shall be installed towards the northern perimeter to serve the garage. The length of this driveway shall be sufficient to accommodate a further two to three vehicles.

A tarmac parking area already exists at the rear of the property, as does a grassy area.

Consideration will be given to using these additional areas indicated in yellow for temporary parking using water permeable materials.
