Proposal for Driveway Extension

I propose to extend my existing driveway by 600mm, increasing its total width from 4.2m to 4.8m. This extension will provide sufficient space to accommodate two vehicles comfortably.

There is no need to extend the dropped kerb, as vehicles will be able to maneuver into the driveway without difficulty. The extension will be constructed using materials that match the existing driveway to maintain a uniform appearance.

Appropriate drainage measures will be considered to ensure surface water is managed effectively, in compliance with local regulations. There should be no impact on drainage from extending the driveway by 600mm
