MANCHESTER, M45 6AD**

Design & Access Statement

Installation of an ATM and associated signage (Retrospective)

Appearance

We have installed an ATM to the right-hand side of the main entrance. The ATM has been installed through an existing laminated glazed panel as a through-panel installation.

The site at 118 Bury New Road, Whitefield forms part of an established local shopping frontage characterised by a mix of commercial uses along Bury New Road with residential properties in the surrounding area.

We consider that the installation of the ATM is sympathetic to the host property and is not detrimental to the character or appearance of the existing street scene.

The site is not located within a conservation area, and the building is not listed.

Use

The purpose of the installation of this Automated Teller Machine is to provide a 24-hour banking facility for the local community and visitors to the area.

Scale

N/A

Layout

The installation of this ATM has not altered the basic design of the building. We have formed an aperture through a laminate panel with an aperture for the ATM face.

Amount

This is not a new structure, but the installation of an ATM in an existing shop.

Landscaping

Due to the nature of the proposal, we feel the application will not benefit from any landscaping.

Design Principles

The ATM is of standard design and located in many areas throughout the UK and is accepted as a necessary facility. There are a number of mandatory standards which apply, relating to the position of the ATM, it's visibility, ambient lighting, building structure, building security features, ATM anchoring, safe strength.

Designing out Crime

We install and anchor the ATMs in accordance with National Guidelines.

Site approval by the Cash in Transit Company has been obtained. They have considered routes to and from the ATM, ensuring there is protection of their staff and of any staff or customers at the site. Paramount in their review has been the welfare of their staff and the persons they come into contact with.

The area where the ATM is installed is in a well-lit open area in full view of pedestrians aiding natural surveillance. There is existing CCTV covering the ATM area.

Access

The access to the site and other properties has not been affected. In designing this application, we have taken into account the needs of able and disabled users. The ATM is set at a height that makes it accessible for all users and has space to the front for a wheelchair. Key 5 has raised markings for blind persons to identify the centre key.
