All materials and workmanship to be accordance with the current British Standards and codes of practice.

This drawing is to be read in conjunction with all relevant Architectural Structural Engineers, Mechanical Engineers, Electrical Engineers and Specialists drawings and specifications.

- Two shops nos. 142 & 144 to merge into one to facilitate customers of existing local shop business to provide better/wider space.  
This change will improve the health & safety & experience of shop users.
- Existing shop entrance of no. 142 will be closed and replaced with new aluminum shop front to match existing
- Existing first floor flat entrance front door to be removed and the space to be added into the shop front.
- New door to be created at rear with new set of metal staircase for the access of first floor flat
- New door to match with windows
- New metal staircase to be fully galvanized and finish with external quality metal paint in black colour

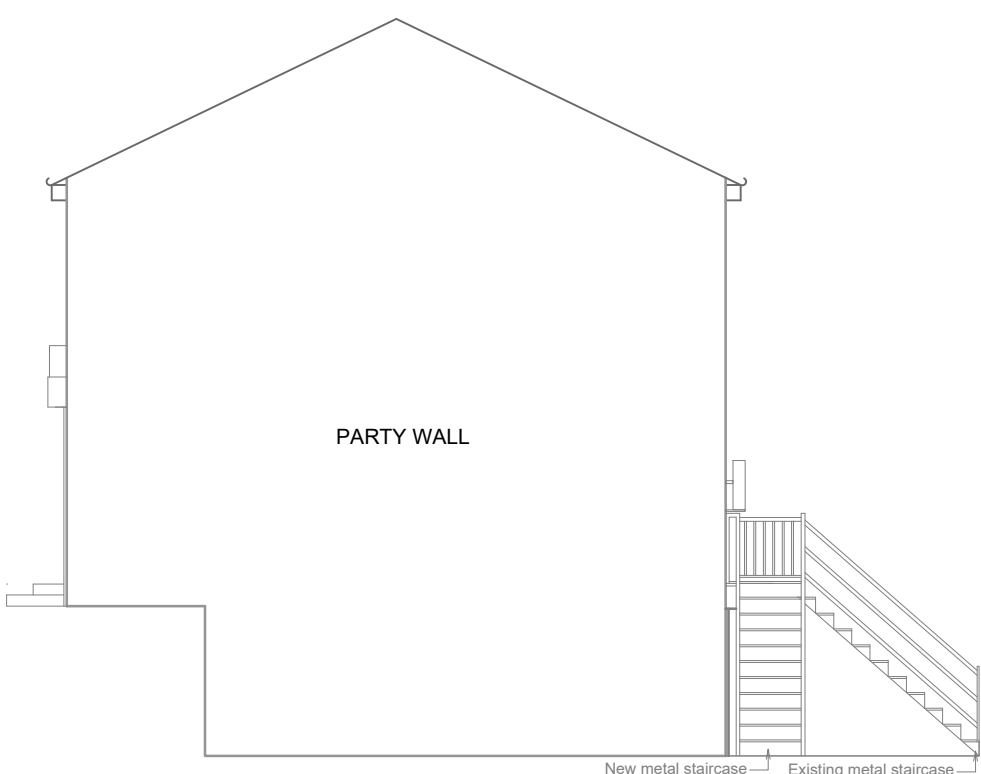

Overview;  
This application has two shops, both have two different businesses. No 142 is hair & beauty shop and no. 144 is local convenience store which is serving local community from many years. The applicant has bought no. 142 and is seeking to add that shop space into the existing business, by removing the internal wall. The entrance for no. 142 will be closed and replaced with a shop front window to match existing.  
There is a door to the front which is serving first floor flat, that door will be removed and shop front will extend in full width. The steel beam is already in-place and no structural amendment is required to the front elevation.  
A new door with a set of metal staircase to the rear elevation is a part of proposal, this new door will serve first floor flat for a safe and easy access.  
This change to the business will facilitate customers of existing business to provide better/wider space.  
This change will improve the health & safety & experience of shop users.
