

Digital Connectivity

(Policy JP-C2: Digital Connectivity)

The site is a rural site and the only wired facilities in place at the moment is FTTC broadband giving max download speeds of 74Mbps.

There is a telegraph pole located on the site so all the new dwellings can have their own service easily added via overhead cable. Similarly, if the supply to the pole is upgraded to full fibre then the cables from the pole to the houses can also easily be upgraded to full fibre.
