

Type, Size and Design of New Housing

(Policy JP-H3: Type, Size and Design of New Housing)

The new dwellings conform to the Nationally Prescribed Space Standards. Please refer to the Space Standards table attached.

We confirm the new dwellings will be built to the 'accessible and adaptable' standard in Part M4(2) of the Building Regulations. The exact details of this will be determined at detailed design stage.

Range of dwelling types, sizes.

This is not a commercial housing development, it is for the current inhabitants to form their own homes. In this regard the new dwellings are effectively self builds. Each of the dwellings will be very different due to the arrangement of the existing building and each of them will have a different number of bedrooms.
