

WASTE MANAGEMENT

Waste will be held in the rear yard of the property as showcased on the site plan below. The business will utilise a commercial waste company to collect our waste from the yard directly. They will be able to gain access to the yard from the entrance on Crompton Street, therefore no waste will need to come through the building.

If this cannot be negotiated for any reason, then the waste will be stored on collection day at the end of the alleyway entrance on Crompton Street to avoid being in the public way on the pavement.
