

NOTICE OF PLANNING PERMISSION

Town and Country Planning Act 1990 Town and Country Planning (Development Management Procedure) (England) Order 2015

To:

Mr Gary Dearden
PPY design Ltd
2 Helmsore Road
Holcombe Village
Bury
BL8 4PA

On Behalf Of:

Mr Andrew Warburton
10 Carnoustie Drive
Ramsbottom
Bury
BL0 9QL

PART 1 - Particulars of Application

Application Number: 72368

Date of Registration: 16/10/2025

Proposal:

Construction of 2 no. industrial units (Use Class E(g)(iii) - Industrial processes)

Location:

Saw Mills, off Spring Street, Ramsbottom, Bury, BL0 9JQ

PART 2 - Particulars of Decision

Bury Metropolitan Borough Council hereby give notice in pursuance of the provisions of the Town and Country Planning Act 1990 that permission has been **GRANTED** for the carrying out of the development referred to in Part 1 hereof in accordance with the application and plans submitted subject to the following conditions:-

- 1 The development must be begun not later than three years beginning with the date of this permission.
Reason. Required to be imposed by Section 91 Town & Country Planning Act 1990.
- 2 This decision relates to drawings numbered AW6-00, AW6-01, AW6-02B, AW6-03A and the development shall not be carried out except in accordance with the drawings hereby approved.
Reason. For the avoidance of doubt and to ensure a satisfactory standard of design pursuant to the policies of the Bury Unitary Development Plan and Places for Everyone Joint Development Plan listed.
- 3 Details/Samples of the materials to be used in the external elevations, together with details of their manufacturer, type/colour and size, shall be submitted to and approved in writing by the Local Planning Authority before the development is commenced. Only the approved materials/bricks shall be used for the construction of the development.
Reason. No material samples have been submitted and are required in the interests of visual amenity and to ensure a satisfactory development pursuant to UDP Policy EN1/2 - Townscape and Built Design
- 4 The development hereby approved within any approved phase shall not be brought

into use until written confirmation is provided to the Local Planning Authority that unexpected or previously unidentified contamination was not encountered during the course of development works.

If, during development, unexpected contamination is found to be present on the site, no further works shall be carried out at the affected location until the following are submitted to the Local Planning Authority for approval:

- I. Risk Assessment (GQRA or DQRA);
- II. Remediation Strategy & Verification Plan;

If remediation is required, it shall be carried out in accordance with the approved Remediation Strategy. Upon completion of remediation works, a Verification Report shall be submitted for approval. The Verification Report must include information validating all remediation works carried out; details of imported materials (source/quantity/suitability); details of exported materials; and details of any unexpected contamination.

Reason. To prevent unacceptable risk to Human Health and Controlled Waters and to prevent pollution of the environment in accordance with the aims and Paragraphs 187(f), 196 and 197 of the National Planning Policy Framework (December 2024).

- 5 Any soil or soil forming materials to be brought to site for use in garden areas, soft landscaping, filling and level raising shall be tested for contamination and suitability for use.

Proposals for contamination testing including testing schedules, sampling frequencies and allowable contaminant concentrations (as determined by appropriate risk assessment) and source material information shall be submitted to the Local Planning Authority for approval prior to any soil or soil forming materials being brought onto site.

The approved contamination testing shall then be carried out and validity evidence (soil descriptions, laboratory certificates, photographs etc.) submitted to Local Planning Authority for approval prior to the development being brought into use.

Reason. To prevent unacceptable risk to Human Health and Controlled Waters and to prevent pollution of the environment in accordance with the aims and Paragraphs 187(f), 196 and 197 of the National Planning Policy Framework (December 2024).

- 6 Development shall not commence until details of surface water drainage proposals have been submitted to and approved by the Local Planning Authority. The scheme must be based on the hierarchy of drainage options in the National Planning Practice Guidance and be designed in accordance with the Non-Statutory Technical Standards for Sustainable Drainage Systems (March 2015) or subsequent revisions of it. This must include assessment of potential SuDS options for surface water drainage with appropriate calculations and test results to support the chosen solution. Design details should comply with guidance contained in the Greater Manchester's Sustainable Drainage Design Guide, March 25. Details of proposed maintenance arrangements should also be provided

Reason. The current application contains insufficient information regarding the proposed drainage scheme to fully assess the impact. To promote sustainable development and reduce flood risk pursuant to Bury Unitary Development Plan Policies EN7/3 - Water Pollution, EN7/5 - Waste Water Management, Places for Everyone Joint Development Framework Policy JP-S4 - Flood Risk and the Water Environment and chapter 14 - Meeting the challenge of climate change, flooding and coastal change of the NPPF.

- 7 No construction shall commence until details of the means of ensuring the water

main that is laid within the site boundary is protected from damage as a result of the development have been submitted to and approved by the Local Planning Authority in writing. The details shall outline the potential impacts on the water main from construction activities and the impacts post completion of the development on the water main infrastructure that crosses the site and identify mitigation measures to protect and prevent any damage to the water main both during construction and post completion of the development. Any mitigation measures shall be implemented in full in accordance with the approved details.

Reason. In the interest of public health and to ensure protection of the public water supply pursuant to the principles of chapter 14 - Meeting the challenge of climate change, flooding and coastal change of the NPPF.

- 8 No development shall take place unless and until a B24142 noise assessment has been carried out to determine the ambient noise levels of the existing site. A copy of the report shall be submitted to and approved in writing by the Local Planning Authority prior to the commencement of any further works. Noise from or associated with the proposed activity/development hereby permitted shall not increase the prevailing ambient noise levels as measured at the boundary of the site.

Reason. To prevent nuisance from noise to the occupiers of the adjacent residential properties pursuant to the NPPF and UDP Policy EN7/2 Noise Pollution.

- 9 The use hereby permitted shall not be open outside the following times: 08:00 to 18:00 Monday to Friday, 09:00 to 14:00 on Saturdays and at no time on Sundays and Bank Holidays.

Reason. To safeguard the amenities of the occupiers of nearby residential accommodation pursuant to the NPPF and UDP Policy EN7/2 Noise Pollution.

- 10 The tree planting and bat box scheme shown on drawing AW6-02B hereby approved shall be implemented not later than 12 months from the date the building is first occupied. Any trees or shrubs removed, dying or becoming severely damaged or becoming seriously diseased within 5 years of planting shall be replaced by trees or shrubs of a similar size and species to those originally required to be planted.

Reason. To secure the satisfactory development of the site and in the interests of visual amenity pursuant to Policy EN8/2 – Woodland and Tree Planting of the Bury Unitary Development Plan.

- 11 The development shall be constructed in accordance with the programme of mitigation for bats and owls in trees approved under condition 8 of application 68578. All mitigation measures shall be fully implemented prior to the commencement of the works and remain in situ on site for the agreed period of time.

Reason. In order to ensure that no harm is caused to a Protected Species pursuant to policies JP-G8 – A Net Enhancement of Biodiversity and Geodiversity of the Places for Everyone Joint Development Framework, EN6/3 – Features of Ecological Value of the Bury Unitary Development Plan and Section 11 of the National Planning Policy Framework.

- 12 No works to trees or shrubs shall occur between the 1st March and 31st August in any year unless a detailed bird nest survey by a suitably experienced ecologist has been carried out immediately prior to clearance and written confirmation provided to the Local Planning Authority that no active bird nests are present.

Reason. In order to ensure that no harm is caused to a Protected Species pursuant to policies JP-G8 – A Net Enhancement of Biodiversity and Geodiversity of the

- 13 No development, further site clearance, earth moving shall take place or material or machinery brought on site until a method statement to protect the unnamed watercourse from accidental spillages, dust and debris has been supplied to and approved in writing by the Local Planning Authority. All the approved measures must be implemented before construction commences and maintained for the duration of the construction period. Details of the protection of the watercourse from surface water drainage post development shall also be submitted for approval.
Reason. No details have been provided at application stage. To ensure a safe and satisfactory development of the site and ensure the protection of the watercourse from any pollutants and construction disturbance which may cause risk, pursuant to chapter 15 - Conserving and enhancing the natural environment of the NPPF.
- 14 No development shall commence until;
a) a scheme of intrusive site investigations has been carried out on site to establish the risks posed to the development by past coal mining activity, and;
b) any remediation works and/or mitigation measures to address land instability arising from coal mining legacy, as may be necessary, have been implemented on site in full in order to ensure that the site is made safe and stable for the development proposed.
The intrusive site investigations and remedial works shall be carried out in accordance with authoritative UK guidance.
Reason. The undertaking of intrusive site investigations, prior to the commencement of development, is considered to be necessary to ensure that adequate information pertaining to ground conditions and coal mining legacy is available to enable appropriate remedial and mitigatory measures to be identified and carried out before building works commence on site. This is in order to ensure the safety and stability of the development, in accordance with paragraphs 187, 196 & 197 of the National Planning Policy Framework.
- 15 Prior to the occupation of the development, or it being taken into beneficial use, a signed statement or declaration prepared by a suitably competent person confirming that the site is, or has been made, safe and stable for the approved development shall be submitted to the Local Planning Authority for approval in writing. This document shall confirm the methods and findings of the intrusive site investigations and the completion of any remedial works and/or mitigation necessary to address the risks posed by past coal mining activity.
Reason. The undertaking of intrusive site investigations, prior to the commencement of development, is considered to be necessary to ensure that adequate information pertaining to ground conditions and coal mining legacy is available to enable appropriate remedial and mitigatory measures to be identified and carried out before building works commence on site. This is in order to ensure the safety and stability of the development, in accordance with paragraphs 187, 196 & 197 of the National Planning Policy Framework.
- 16 The development hereby approved shall not be commenced unless and until a photographic dilapidation survey of the access to the site (Caltha Street) has been undertaken, submitted to, and agreed in writing by the Local Planning Authority. Within one month of the completion of the development a further survey shall be undertaken to assess the condition of the route in relation to this dilapidation survey and the dilapidation survey submitted as part of condition 14 of application 68578 to

identify any remedial works required. Any remedial works as a result of damage caused by the demolition/construction traffic shall be undertaken at the expense of the applicant, to a specification commensurate to the status of the access and to a programme to be agreed with the Local Planning Authority.

Reason. To maintain the integrity of the unadopted highway in the interests of highway safety pursuant to Development Plan Policies EN1/2 - Townscape and Built Design, JP-C5 - Streets for All, and JP-C6 - Walking and Cycling.

- 17 No development shall commence unless and until a 'Construction Traffic Management Plan' (CTMP), has been submitted to and agreed in writing with the Local Planning Authority and shall confirm/provide the following:

1. Access point for construction traffic from the adopted highway/unadopted Caltha Street;
2. Site hoardings (if proposed) clear of the approved turning facility and any access to the adjacent residential properties;
3. Hours of operation and number of vehicle movements;
4. A scheme of appropriate warning/construction traffic signage in the vicinity of the site and its access from Spring Street;
5. Parking on site (or on land under the applicant's control) of operatives' and demolition/construction vehicles together with storage on site of demolition/construction materials, including any requisite phasing of the development to accommodate this;
6. Delivery management arrangements to ensure that such vehicles do not obstruct the adopted highway or access to the adjacent residential properties;
7. Measures to ensure that all mud and other loose materials are not spread onto the adjacent adopted highways as a result of the groundworks operations or carried on the wheels and chassis of any vehicles leaving the site and measures to minimise dust nuisance caused by the operations

The approved plan shall be adhered to throughout the demolition and construction periods and the measures shall be retained and facilities used for the intended purpose for the duration of the both periods. The areas identified shall not be used for any other purposes other than the parking of vehicles and storage of demolition/construction materials. All highway remedial works identified as a result of the dilapidation survey shall be implemented to the written satisfaction of the Local Planning Authority prior to the development hereby approved being occupied.

Reason. Information not submitted at application stage. To maintain the integrity of the adopted highway, mitigate the impact of the construction traffic generated by the proposed development on the adjacent adopted highways, ensure adequate off street car parking provision and materials storage arrangements for the duration of the construction period and ensure that the adopted highways are kept free of deposited material from the ground works operations, in the interests of highway safety pursuant to Development Plan Policies EN1/2 - Townscape and Built Design, JP-C5 - Streets for All, and JP-C6 - Walking and Cycling.

- 18 The development hereby approved shall not be brought into use unless and until the pedestrian and vehicular access alterations, gate set back from Caltha Street and bin storage arrangements indicated on approved plan reference AW6-02B have been implemented and thereafter maintained.

Reason. To ensure good highway design and secure satisfactory pedestrian and vehicular access to the development, in the interests of highway safety pursuant to Development Plan Policies EN1/2 - Townscape and Built Design, JP-C5 - Streets for All, and JP-C6 - Walking and Cycling.

- 19 The turning facilities indicated on approved plan reference AW6-02B shall be

implemented before the development is brought into use and shall subsequently be maintained free of obstruction at all times.

Reason. To minimise the standing and turning movements of vehicles on the highway in the interests of road safety pursuant to Development Plan Policies EN1/2 - Townscape and Built Design, JP-C5 - Streets for All, and JP-C6 - Walking and Cycling.

- 20 The car parking indicated on indicated on approved plan reference AW6-02B shall be surfaced, demarcated and made available for use prior to the development hereby approved being brought into use and thereafter maintained at all times.
Reason. To ensure adequate off street car parking provision in the interests of road safety pursuant to policy HT2/4 - Car Parking and New Development of the Bury Unitary Development Plan.
- 21 The premises shall be used for Use Class E(g)(iii) Industrial processes only and for no other purposes, including any other purpose in Class E of the Schedule to the Town and Country Planning (Use Classes) Order 1987 or as subsequently amended.
Reason. To ensure that future inappropriate changes of use do not occur pursuant to policies of the Unitary Development Plan and Places for Everyone Joint Development Plan listed.

Statement in accordance with Article 35(2) Town and Country Planning (Development Management Procedure) (England) (Amendment) Order 2015

The Local Planning Authority worked positively and proactively with the applicant to identify various solutions during the application process to ensure that the proposal comprised sustainable development and would improve the economic, social and environmental conditions of the area and would accord with the development plan. These were incorporated into the scheme and/or have been secured by planning condition. The Local Planning Authority has therefore implemented the requirement in Paragraph 38 of the National Planning Policy Framework.

The following policies of the Bury Unitary Development Plan, National and Regional Government were considered relevant:

EC4/1	EC4/1 - Small Businesses
EC6/1	EC6/1 - New Business, Industrial and Commercial Development
EN1/2	EN1/2 - Townscape and Built Design
EN2/1	EN2/1 - Character of Conservation Areas
EN2/2	EN2/2 - Conservation Area Control
EN6/3	EN6/3 - Features of Ecological Value
EN7/2	EN7/2 - Noise Pollution
EN7/4	EN7/4 - Groundwater Protection
EN7/3	EN7/3 - Water Pollution
EN8/2	EN8/2 - Woodland and Tree Planting
HT2/4	HT2/4 - Car Parking and New Development
H3	H3 - Incompatible Uses in Residential Areas
H3/1	H3/1 - Assessing Non-Conforming Uses
JP-S2	Carbon and Energy
JP-S4	Flood Risk and the Water Environment
JP-S5	Clean Air
JP-P1	Sustainable Places
JP-P2	Heritage
JP-C6	Walking and Cycling
JP-C5	Streets For All
JP-G7	Trees and Woodland
JP-G8	A Net Enhancement of Biodiversity and Geodiversity

- NPPF National Planning Policy Framework
- SPD6 Supplementary Planning Document 6 - Alterations and Extensions to Residential Properties.
- SPD11 Development Control Policy Guidance Note 11 - Parking Standards in Bury

This decision relates only to the Town and Country Planning Acts and does not include any consent or approval under any other enactment or under the Building Regulations. Any other consent or approval which is necessary must be obtained from the appropriate authority.

Applicant Plan Numbers:

AW6-00, AW6-01, AW6-02B, AW6-03A

NOTES TO APPLICANT

2. Surface water discharge to be limited to existing flow from site less a minimum 40% reduction in run-off to allow for climate change to prevent surcharge of public sewerage system downstream of the proposed development Chapter 10 of the National Planning Policy Framework - Meeting the Challenge of Climate Change, Flooding and Coastal Change and Unitary Development Plan Policy EN5/1 - New Development and Flood Risk and its associated SPD 16 Design and Layout of New Development in Bury. Climate change allowance should be increased to 70% for sites which fall within Flood Zone 3.

4. Applications for sewer requisitions should be obtained by telephoning United Utilities PLC at either Dawson House (01925 235871) or Hathersage Road (0161 609 7513)

6. The applicant should ensure that any proposed driveways/paved areas (in excess of 5m²) situated at the front of properties are constructed of permeable or porous materials. The applicant should refer to Dept. of Communities & Local Government publication "Guidance on the Permeable Surfacing of Front Gardens" for design & construction details.

8. It is an offence under the Wildlife & Countryside Act 1981, as amended to introduce, plant or cause to grow wild any plant listed in Schedule 9 part 2 of the Act. Species such as Japanese knotweed and Himalayan balsam are included within this schedule. If any such species will be disturbed as a result of this development a suitably experienced consultant should be employed to advise on how to avoid an offence.

10. In accordance with S93G of the Town and Country Planning Act 1990 (As amended by Section 111 Levelling Up & Regeneration Act 2023) there is a legal requirement for you to inform the Council of the date when you intend to commence the development on site via submission of a Commencement Notice. This notice is mandatory for all developments and came into effect on 31 March 2024. You can find more information and download a copy of the Commencement Notice under the Before Starting Work section on our website at <https://www.bury.gov.uk/planning-building-control/planning-permission/planning-application-process>

12. **COPA INFORMATIVE 01 - THE CONTROL OF POLLUTION REGULATIONS 1974, SECTION 60. CONTROL OF NOISE ON CONSTRUCTION SITES**

Works carried out in connection with the planning permission shall comply with the above regulations which require the following:

1. All works and ancillary operations which are audible at the boundary of the nearest house or noise receptor, or at such other place as may be agreed with the Council, shall be carried out only between the hours of 0800 and 1800 on Mondays to Fridays and between the hours of 0900 and 1400 on Saturdays and at no time on Sundays and Bank Holidays.

2. The best practicable means, as defined in section 72 of the Control of Pollution Act 1974, to reduce noise to a minimum shall be employed at all times.

3. All plant and machinery in use shall be properly silenced and maintained in accordance with the manufacturer's instructions.

4. Any emergency deviation from the above (1 – 3) shall be notified to Bury Council without delay.

Any contravention of these requirements will trigger the serving of a Notice under Section 60 of The Control of Pollution Regulations 1974.

1. The site is to be drained on a separate system of drainage with surface water and foul sewage being combined at the last manhole before connection to public sewer.
3. Application forms for permission to connect to the public sewer should be obtained by telephoning United Utilities PLC on 08456 020406 or on line at www.unitedutilities.com
5. Approval for a surface water connection to the watercourse should be obtained from:
Main River - Environment Agency,
<https://www.gov.uk/government/organisations/environment-agency>

Ordinary Watercourse - Bury Council, Engineering and Streetscene
<https://www.bury.gov.uk/index.aspx?articleid=11128>

7. **United Utilities**

To discuss their drainage proposals the applicant should contact our **Developer Services** team by email at SewerAdoptions@uuplc.co.uk. Alternative ways to contact the team are detailed in the Appendix, Section 6.0 'Contacts' of the United Utilities response published on Bury Council's website.

Please note, United Utilities is not responsible for advising on rates of discharge to the local watercourse system. This is a matter for discussion with the Lead Local Flood Authority and / or the Environment Agency (if the watercourse is classified as a main river).

Management and maintenance of Sustainable Drainage Systems (SuDS)

Without effective management and maintenance SuDS can fail or become ineffective which may have a detrimental impact on the surrounding area, including the performance of the public sewer network (where the two systems interact).

When considering their drainage proposal, it is the applicant's responsibility to investigate the existence of any infrastructure that might impact their detailed design. This includes water, wastewater, operational and/or abandoned pipelines. United Utilities will not routinely carry out this assessment when reviewing drainage proposals submitted within a planning application.

Where infrastructure exists, the drainage design must comply with the relevant United Utilities guidelines and/or Building Regulations. Further information is available on our website: Working near our pipes - United Utilities. Failure to consider existing infrastructure when designing a drainage proposal may result in the applicant having to redesign proposals at a later date.

UNITED UTILITIES' PROPERTY, ASSETS AND INFRASTRUCTURE

Water main

A water main crosses the site. It must not be built over, or our access to the pipeline compromised in any way. We require an access strip as detailed in our 'Standard Conditions for Works Adjacent to Pipelines', which can be found on our website: Working near our pipes - United Utilities . The applicant must comply with this document to ensure pipelines are adequately protected both during and after the construction period.

It is the applicant's responsibility to investigate the existence of any pipelines that might cross or impact their proposed site and also to demonstrate the exact relationship between United Utilities' assets and the proposed development. The applicant should not rely solely on the detail contained within asset maps when considering a proposed layout.

It is important that the supporting information contained in the Appendix, Section 3.0 'United Utilities' Property, Assets and Infrastructure', is read in conjunction with this letter. This provides information that might impact a proposed layout and additional guidance that an applicant or developer must consider when United Utilities assets are located in, or in the locality of, the proposed site.

Where United Utilities' assets exist, it is essential that the applicant, or any subsequent developer, contacts our Developer Services team prior to commencing any works on site, including trial holes, groundworks or demolition. See Appendix, Section 6.0 'Contacts'.

9. Coal Authority

Any intrusive activities which disturb or enter any coal seams, coal mine workings or coal mine entries (shafts and adits) requires a Mining Remediation Authority Permit. Such activities could include site investigation boreholes, excavations for foundations, piling activities, other ground works and any subsequent treatment of coal mine workings and coal mine entries for ground stability purposes. Application forms for Mining Remediation Authority permission and further guidance can be obtained from The Mining Remediation Authority's website at: www.gov.uk/get-a-permit-to-deal-with-a-coal-mine-on-your-property
What is a permit and how to get one? - GOV.UK (www.gov.uk)

In areas where shallow coal seams are present caution should be taken when carrying out any on site burning or heat focused activities.

If any future development has the potential to encounter coal seams which require excavating, for example excavation of building foundations, service trenches, development platforms, earthworks, non-coal mineral operations, an Incidental Coal Agreement will be required. Further information regarding Incidental Coal Agreements can be found here - <https://www.gov.uk/government/publications/incidental-coal-agreement/guidance-not-es-for-applicants-for-incidental-coal-agreements>

11. *The local planning authority considers that approval of a BIODIVERSITY GAIN*

PLAN WILL NOT BE REQUIRED BEFORE DEVELOPMENT COMMENCES

Biodiversity Net Gain

The effect of paragraph 13 of Schedule 7A to the Town and Country Planning Act 1990 is that planning permission granted for development of land in England is deemed to have been granted subject to the condition (biodiversity gain condition) that development may not begin unless:

- (a) a Biodiversity Gain Plan has been submitted to the planning authority,
- and
- (b) the planning authority has approved the plan.

The planning authority, for the purposes of determining whether to approve a Biodiversity Gain Plan, if one is required in respect of this permission would be Bury Council.

There are statutory exemptions and transitional arrangements which mean that the biodiversity gain condition does not always apply. These are listed below.

Based on the information available this permission is considered to be one which will not require the approval of a biodiversity gain plan before development is begun because one or more of the statutory exemptions or transitional arrangements in the list below is/are considered to apply.

Statutory exemptions and transitional arrangements in respect of the biodiversity gain condition.

1. The application for planning permission was made before 12 February 2024.
2. The planning permission relates to development to which section 73A of the Town and Country Planning Act 1990 (planning permission for development already carried out) applies.
3. The planning permission was granted on an application made under section 73 of the Town and Country Planning Act 1990 and
 - (i) the original planning permission to which the section 73 planning permission relates* was granted before 12 February 2024; or
 - (ii) the application for the original planning permission* to which the section 73 planning permission relates was made before 12 February 2024.
4. The permission which has been granted is for development which is exempt being:
 - 4.1 Development which is not 'major development' (within the meaning of article 2(1) of the Town and Country Planning (Development Management Procedure) (England) Order 2015) where:
 - iv) the application for planning permission was made before 2 April 2024;
 - v) planning permission is granted which has effect before 2 April 2024; or
 - vi) planning permission is granted on an application made under section 73 of the Town and Country Planning Act 1990 where the original permission to which the section 73 permission relates* was exempt by virtue of (i) or (ii).

4.2 Development below the de minimis threshold, meaning development which:
iii) does not impact an onsite priority habitat (a habitat specified in a list published under section 41 of the Natural Environment and Rural Communities Act 2006); and
iv) impacts less than 25 square metres of onsite habitat that has biodiversity value greater than zero and less than 5 metres in length of onsite linear habitat (as defined in the statutory metric).

4.6 Development which is subject of a householder application within the meaning of article 2(1) of the Town and Country Planning (Development Management Procedure) (England) Order 2015. A “householder application” means an application for planning permission for development for an existing dwellinghouse, or development within the curtilage of such a dwellinghouse for any purpose incidental to the enjoyment of the dwellinghouse which is not an application for change of use or an application to change the number of dwellings in a building.

4.7 Development of a biodiversity gain site, meaning development which is undertaken solely or mainly for the purpose of fulfilling, in whole or in part, the Biodiversity Gain Planning condition which applies in relation to another development, (no account is to be taken of any facility for the public to access or to use the site for educational or recreational purposes, if that access or use is permitted without the payment of a fee).

4.8 Self and Custom Build Development, meaning development which:
iv) consists of no more than 9 dwellings;
v) is carried out on a site which has an area no larger than 0.5 hectares; and
vi) consists exclusively of dwellings which are self-build or custom housebuilding (as defined in section 1(A1) of the Self-build and Custom Housebuilding Act 2015).

4.5 Development forming part of, or ancillary to, the high speed railway transport network (High Speed 2) comprising connections between all or any of the places or parts of the transport network specified in section 1(2) of the High Speed Rail (Preparation) Act 2013.

* “original planning permission means the permission to which the section 73 planning permission relates” means a planning permission which is the first in a sequence of two or more planning permissions, where the second and any subsequent planning permissions are section 73 planning permissions.

Irreplaceable habitat

If the onsite habitat includes irreplaceable habitat (within the meaning of the Biodiversity Gain Requirements (Irreplaceable Habitat) Regulations 2024) there are additional requirements for the content and approval of Biodiversity Gain Plans.

The Biodiversity Gain Plan must include, in addition to information about steps taken or to be taken to minimise any adverse effect of the development on the habitat, information on arrangements for compensation for any impact the development has on the biodiversity of the irreplaceable habitat.

The planning authority can only approve a Biodiversity Gain Plan if satisfied that the adverse effect of the development on the biodiversity of the irreplaceable habitat is minimised and appropriate arrangements have been made for the purpose of compensating for any impact which do not include the use of biodiversity credits.

The effect of section 73D of the Town and Country Planning Act 1990

If planning permission is granted on an application made under section 73 of the Town and Country Planning Act 1990 (application to develop land without compliance with conditions previously attached) and a Biodiversity Gain Plan was approved in relation to the previous planning permission ("the earlier Biodiversity Gain Plan") there are circumstances when the earlier Biodiversity Gain Plan is regarded as approved for the purpose of discharging the biodiversity gain condition subject to which the section 73 planning permission is granted.

Those circumstances are that the conditions subject to which the section 73 permission is granted:

- i) do not affect the post-development value of the onsite habitat as specified in the earlier Biodiversity Gain Plan, and
- ii) in the case of planning permission for a development where all or any part of the onsite habitat is irreplaceable habitat the conditions do not change the effect of the development on the biodiversity of that onsite habitat (including any arrangements made to compensate for any such effect) as specified in the earlier Biodiversity Gain Plan.

Signed:

12 of 12

.....
On behalf of the Council

Date of Decision: 28/01/2026
