Supporting information requirements

Where a development proposal is likely to affect features of biodiversity or geological conservation interest, you will need to submit, with the application, sufficient information and assessments to allow the local planning authority to determine the proposal.

Failure to submit all information required will result in your application being deemed invalid. It will not be considered valid until all information required by the local planning authority has been submitted.

Your local planning authority will be able to advise on the content of any assessments that may be required.

Biodiversity net gain

Biodiversity net gain is a legal requirement for planning permission introduced on 12 February 2024. All applications are required to either provide detailed information proving there will be a biodiversity increase; or explain why the requirement does not apply to the development.

Do you believe that, if the development is granted permission, the general Biodiversity Gain Condition (as set out in Paragraph 13 of Schedule 7A of the Town and Country Planning Act 1990 (as amended)) would apply?

◯ Yes
⊘ No

Biodiversity net gain has been introduced as a general condition for planning permission. As set out in The Environment Act 2021: "grants of planning permission in England [are] to be subject to a condition to secure that the biodiversity gain objective is met". Therefore, in England, all planning permissions are generally subject to biodiversity gain rules, unless they are specifically exempt or out of scope.

If you have stated that the biodiversity net gain requirement does not apply to your application you must provide the reason(s) why, and may also need to supply evidence (especially where you believe the application is eligible for the 'de minimis' exemption).

Please add all the reasons why biodiversity net gain does not apply and enter a justification for each one

Reason biodiversity net gain does not apply:
Development site area of 0.2 hectares or below

Are there any priority habitats on or within 500m of your site?:
No

Can you evidence that you carried out a site assessment if the local authority disputes the presence of priority habitats?:
Yes

Please justify the reason why biodiversity net gain does not apply:
Site's red line area independently confirmed to be <0.2ha; see attached document. A desk-based assessment of the MAGIC dataset and a site visit by a competent person confirm the absence of priority habitat on site. Priority habitat has been identified within 500m of the red line, but there is no evidence that the habitat has expanded to the site or will be otherwise impacted by the development (see attached document for priority habitat information and evidence of no impact; GeoJSON evidence can be provided upon request).

Please read the help text for further information why developments may be exempt or not in scope.

Foul Sewage

Please state how foul sewage is to be disposed of:

- [x] Mains sewer
- [ ] Septic tank
- [ ] Package treatment plant
- [ ] Cess pit
- [ ] Other
- [ ] Unknown

Are you proposing to connect to the existing drainage system?

- (x) Yes
- ( ) No
- ( ) Unknown

If Yes, please include the details of the existing system on the application drawings and state the plan(s)/drawing(s) references

Foul Drainage: The new foul drainage from the kitchen, bathroom, and utility room will connect into the existing foul drainage system at the existing inspection chamber at the rear of the property.
Surface Water: Surface water from the roof of the extension will connect to the existing surface water drainage system. The site is already developed, and the additional impermeable area is minimal. The drainage strategy follows the principles of the surface water hierarchy

Please see Drawings No:
101, 102, 103, 110 and 112

Waste Storage and Collection

Do the plans incorporate areas to store and aid the collection of waste?

- (x) Yes
- ( ) No
