

NOTICE OF PLANNING PERMISSION

Town and Country Planning Act 1990 Town and Country Planning (Development Management Procedure) (England) Order 2015

To:

Mr Sam Golding
Gold Sketch Studios LTD
55a Bury Old Road
Prestwich
M25 0FG

On Behalf Of:

SAC Property Developments Ltd
C/O agent

PART 1 - Particulars of Application**Application Number:** 68709**Date of Registration:** 04/05/2023**Proposal:**

Erection of 2 no. detached dwellings.

Location:

Land adjacent to 23 Meadway, Bury, BL9
9TY

PART 2 - Particulars of Decision

Bury Metropolitan Borough Council hereby give notice in pursuance of the provisions of the Town and Country Planning Act 1990 that permission has been **GRANTED** for the carrying out of the development referred to in Part 1 hereof in accordance with the application and plans submitted subject to the following conditions:-

- 1 The development must be begun not later than three years beginning with the date of this permission.
Reason. Required to be imposed by Section 91 Town & Country Planning Act 1990.
- 2 This decision relates to drawings - Site - location and block plan 001 rev 6; Existing site 501 rev 4; Proposed site plan 502 rev 4; Site topo existing 503; Site - topo-proposed 504 rev 1; Proposed plans 002 rev 3; Proposed plans and elevations 003 rev 4; Foul & Surface Water Drainage Design Drawing FRA 22 1125, Rev 2- Dated 01/2023 prepared by LK Group; updated Invasive Species Survey and Management Plan by LK Group, Job Number: IPM 22 1006 version 003 (received 15/9/23) and the development shall not be carried out except in accordance with the drawings hereby approved.
Reason. For the avoidance of doubt and to ensure a satisfactory standard of design pursuant to the policies of the Bury Unitary Development Plan listed.
- 3 No development shall commence unless and until:-
 - A contaminated land Preliminary Risk Assessment report to assess the actual/potential contamination and/or ground gas/landfill gas risks at the site shall be submitted to, and approved in writing by, the Local Planning Authority;
 - Where actual/potential contamination and/or ground gas/landfill gas risks have been identified, detailed site investigation and suitable risk assessment shall be submitted to, and approved in writing by the Local Planning Authority;

- Where remediation/protection measures is/are required, a detailed Remediation Strategy shall be submitted to, and approved in writing by, the Local Planning Authority.

Reason. The scheme does not provide full details of the actual contamination and subsequent remediation, which is required to secure the satisfactory development of the site in terms of human health, controlled waters, ground gas and the wider environment and pursuant to National Planning Policy Framework Section 15 - Conserving and enhancing the natural environment.

- 4 Following the provisions of Condition 3 of this planning permission, where remediation is required, the approved Remediation Strategy must be carried out to the satisfaction of the Local Planning Authority within agreed timescales; and A Site Verification Report detailing the actions taken and conclusions at each stage of the remediation works, including substantiating evidence, shall be submitted to and approved in writing by the Local Planning Authority prior to the development being brought into use.

Reason. To secure the satisfactory development of the site in terms of human health, controlled waters and the wider environment and pursuant to National Planning Policy Framework Section 15 - Conserving and enhancing the natural environment.

- 5 Prior to occupation the applicant shall provide 1 Electric Vehicle Chargepoint (minimum 7kW*) for each dwelling.

*Mode 3, 7kW (32A) single phase, or 22kW (32A) three phase, and for 50kW Mode 4 rapid charging may be required. British Standard BS EN 61851-1:2011 to be used (note this version is due to be replaced by BS EN 61851-1:2019 on 5 July 2022).

Reason. In accordance with the NPPF, to encourage the uptake of ultra-low emission vehicles and ensure the development is sustainable. To safeguard residential amenity, public health and quality of life.

- 6 The dwellings hereby approved shall be raised above the 0.1%AEP flood level to a floor level 69.48m AOD as detailed on the approved plan Site - Topo- Proposed 504 rev 1.

Reason. To secure the safe and satisfactory development of the site pursuant to the principles of chapter 14 of the NPPF.

- 7 The drainage for the development hereby approved, shall be carried out in accordance with principles set out in the submitted Foul & Surface Water Drainage Design Drawing FRA 22 1125, Rev 2- Dated 01/2023 which was prepared by LK Group. For the avoidance of doubt surface water must drain at the restricted rate of 5l/s.

Prior to occupation of the proposed development, the drainage schemes shall be completed in accordance with the approved details and retained thereafter for the lifetime of the development.

Reason. To ensure a satisfactory form of development and to prevent an undue increase in surface water run-off and to reduce the risk of flooding pursuant to Unitary Development Plan Policies EN5/1- New Development and Flood Risk , EN7/3 - Water Pollution and EN7/5 - Waste Water Management and chapter 14 - Meeting the challenge of climate change, flooding and coastal change of the NPPF.

- 8 No development shall commence until;
 - a) a scheme of intrusive investigations has been carried out on site to establish the risks posed to the development by past shallow coal mining activity; and
 - b) any remediation works and/or mitigation measures to address land instability arising from coal mining legacy, as may be necessary, have been implemented on site in full in order to ensure that the site is made safe and stable for the development proposed.

The intrusive site investigations and remedial works shall be carried out in accordance with authoritative UK guidance.

Reason. The undertaking of intrusive site investigations, prior to the commencement of development, is considered to be necessary to ensure that adequate information pertaining to ground conditions and coal mining legacy is available to enable appropriate remedial and mitigatory measures to be identified and carried out before building works commence on site. This is in order to ensure the safety and stability of the development, in accordance with paragraphs 183 and 184 of the National Planning Policy Framework.

- 9 Prior to the occupation of the development, or it being taken into beneficial use, a signed statement or declaration prepared by a suitably competent person confirming that the site is, or has been made, safe and stable for the approved development shall be submitted to the Local Planning Authority for approval in writing. This document shall confirm the methods and findings of the intrusive site investigations and the completion of any remedial works and/or mitigation necessary to address the risks posed by past coal mining activity.

Reason. The undertaking of intrusive site investigations, prior to the commencement of development, is considered to be necessary to ensure that adequate information pertaining to ground conditions and coal mining legacy is available to enable appropriate remedial and mitigatory measures to be identified and carried out before building works commence on site. This is in order to ensure the safety and stability of the development, in accordance with paragraphs 183 and 184 of the National Planning Policy Framework.

- 10 No works to trees or shrubs shall occur between the 1st March and 31st August in any year unless a detailed bird nest survey by a suitably experienced ecologist has been carried out immediately prior to clearance and written confirmation provided that no active bird nests are present which has been agreed in writing by the Local Planning Authority.

Reason. In order to ensure that no harm is caused to a Protected Species pursuant to policies EN6 - Conservation of the Natural Environment and EN6/3 - Features of Ecological Value of the Bury Unitary Development Plan and National Planning Policy Framework Section 15 - Conserving and enhancing the natural environment.

- 11 Prior to any vegetation clearance or earthworks a reasonable avoidance measures method statement for mammals and amphibians shall be provided to and approved in writing by the Local Planning Authority. The approved measures shall thereafter be implemented in accordance with the method statement and for the duration of the works.

Reason. In order to ensure that no harm is caused to a Protected Species pursuant to policies EN6 - Conservation of the Natural Environment and EN6/3 - Features of Ecological Value of the Bury Unitary Development Plan and National Planning Policy Framework Section 15 - Conserving and enhancing the natural environment.

- 12 The development hereby approved shall be carried out in accordance with the recommendations of the updated Invasive Species Survey and Management Plan by LK Group, Job Number: IPM 22 1006 version 003 (received 15/9/23).

Reason. To ensure the safe and satisfactory development of the site pursuant to Bury UDP Policy EN9 - Landscape and the National Planning Policy Framework Section 15 - Conserving and enhancing the natural environment.

- 13 The development hereby approved shall be carried out in accordance with the proposed landscaping to provide 3 native medium standard trees and native hedging as detailed on the proposed site plan dwg 502 rev 4 and shall also provide for bird and bat boxes as shown on approved plan 003 rev 4 and a swift brick provided in

each of the approved dwellings.

The approved schemes shall thereafter be implemented not later than 12 months from the date the building(s) is first occupied or within the first available tree planting season,; and any trees or shrubs removed, dying or becoming severely damaged or becoming severely diseased within five years of planting shall be replaced by trees or shrubs of a similar size or species to those originally required to be planted.

Reason. To secure the satisfactory development of the site and in the interests of visual amenity pursuant to Policies H2/2 - The Layout of New Residential Development, EN1/2 - Townscape and Built Design and EN8/2 - Woodland and Tree Planting of the Bury Unitary Development Plan and chapter 15 - Conserving and enhancing the natural environment of the NPPF.

- 14 All trees to be retained on site shall be protected in accordance with BS 5837:2012 "Trees in relation to design, demolition and construction". The development shall not commence unless and until the measures required by the British Standard are implemented and all measures required shall remain in situ until the development has been completed.

Reason. To avoid the loss of trees which are of amenity value to the area pursuant to Policy EN1/2 - Townscape and Built Design and EN8/2 – Woodland and Tree Planting of the Bury Unitary Development Plan.

- 15 Notwithstanding the terms of the Town and Country Planning (General Permitted Development) (England) Order 2015, as subsequently amended, no development shall be carried out within the terms of Classes A to G of Part 1 of Schedule 2 of the Order, without the submission and approval of a relevant planning application.

Reason. To ensure that future inappropriate alterations or extensions do not occur pursuant to policies of the Unitary Development Plan listed.

- 16 Notwithstanding the submitted 'Construction Traffic Management Plan' (CTMP), no development shall commence unless and until a CTMP has been submitted to and agreed in writing with the Local Planning Authority and shall confirm/provide the following:

- Photographic dilapidation survey of the footways and carriageways leading to and abutting the site in the event that subsequent remedial works are required following construction of the development and as a result of statutory undertakers connections to the site;
- Access route for all construction vehicles to the site from the Key Route Network;
- Access point/arrangements for construction traffic from the shared private access/Meadway and all temporary works required to facilitate access for construction vehicles;
- If proposed, details of site hoarding/gate positions, incorporating the provision, where necessary, of temporary pedestrian facilities/protection measures;
- A scheme of appropriate warning/construction traffic speed signage in the vicinity of the site and its access;
- Confirmation of hours of operation, delivery and construction vehicle sizes that can be accommodated on the shared private access that serves the site and number of vehicle movements;
- Arrangements for the turning and manoeuvring of vehicles within the curtilage of the site and measures to control/manage delivery vehicle manoeuvres;
- Parking on site or on land within the applicant's control of operatives' and construction vehicles, together with storage on site of construction materials;
- Measures to ensure that all mud and other loose materials are not spread onto the adjacent adopted highways as a result of the groundworks operations or carried on the wheels and chassis of any vehicles leaving the site and measures

to minimise dust nuisance caused by the operations.

The approved plan shall be adhered to throughout the construction period and the measures shall be retained and facilities used for the intended purpose for the duration of the construction period.

Reason. Information not submitted at application stage. To mitigate the impact of the construction traffic generated by the proposed development on the adjacent residential streets, and ensure adequate off street car parking provision and materials storage arrangements for the duration of the construction period and that the adopted highways are kept free of deposited material from the ground works operations, in the interests of highway safety pursuant to Bury Unitary Development Plan Policies EN1/2 - Townscape and Built Design and HT6/2 - Pedestrian/Vehicular Conflict.

- 17 The proposed passing place, driveway positions, parking and bin storage arrangements indicated on approved plan reference GSS22015.3 502 Revision 4 shall be implemented to the satisfaction of the Local Planning Authority prior to the dwellings hereby approved being first occupied and thereafter maintained, with the passing place retained for this use and not for use as a parking facility for occupants of/visitors to the proposed or existing dwellings served by the private shared access.
Reason. To secure the satisfactory development of the site in terms of highway safety, ensure good highway design, maintain the integrity of the adopted highway, all in the interests of highway safety pursuant to Bury Unitary Development Plan Policies H2/2 - The Layout of New Residential Development, HT2/4 - Car Parking and New Development and HT6/2 - Pedestrian/Vehicular Conflict.
- 18 No development shall commence unless and until details of the means of ensuring the 900*1500mm combined water sewer that is laid within the site boundary is protected from damage as a result of the development have been submitted to and approved by the Local Planning Authority in writing. The details shall outline the potential impacts from construction activities and the impacts post completion of the development on the our 900*1500mm combined water sewer that crosses the site and identify mitigation measures to protect and prevent any damage to the pipeline both during construction and post completion of the development. Any mitigation measures shall be implemented in full in accordance with the approved details.
Reason. In the interest of public health and safety and to ensure protection of essential services pursuant to the principles of the NPPF.
- 19 The proposed rear boundary treatment shall include areas to allow for the movement of hedgehogs and shall be thereafter be maintained as such.
Reason. In order to ensure that no harm is caused to a Protected Species pursuant to policies EN6 - Conservation of the Natural Environment and EN6/3 - Features of Ecological Value of the Bury Unitary Development Plan and National Planning Policy Framework Section 15 - Conserving and enhancing the natural environment.

Statement in accordance with Article 35(2) Town and Country Planning (Development Management Procedure) (England) (Amendment) Order 2015

The Local Planning Authority worked positively and proactively with the applicant to identify various solutions during the application process to ensure that the proposal comprised sustainable development and would improve the economic, social and environmental conditions of the area and would accord with the development plan. These were incorporated into the scheme and/or have been secured by planning condition. The Local Planning Authority has therefore implemented the requirement in Paragraph 38 of the National Planning Policy Framework.

The following policies of the Bury Unitary Development Plan, National and Regional Government were considered relevant:

NPPF	National Planning Policy Framework
H1/2	H1/2 - Further Housing Development
H2/1	H2/1 - The Form of New Residential Development
H2/2	H2/2 - The Layout of New Residential Development
H2/6	H2/6 - Garden and Backland Development
EN1/2	EN1/2 - Townscape and Built Design
EN6/4	EN6/4 - Wildlife Links and Corridors
EN5/1	EN5/1 - New Development and Flood Risk
OL5/2	OL5/2 - Development in River Valleys
HT2/4	HT2/4 - Car Parking and New Development
HT6/2	HT6/2 - Pedestrian/Vehicular Conflict
RT1/1	RT1/1 - Protection of Recreation Provision in the Urban Area
SPD11	Development Control Policy Guidance Note 11 - Parking Standards in Bury
SPD6	Supplementary Planning Document 6 - Alterations and Extensions to Residential Properties.

This decision relates only to the Town and Country Planning Acts and does not include any consent or approval under any other enactment or under the Building Regulations. Any other consent or approval which is necessary must be obtained from the appropriate authority.

Applicant Plan Numbers:

Site - location and block plan 001 rev 6; Existing site 501 rev 4; Proposed site plan 502 rev 4; Site topo existing 503; Site - topo- proposed 504 rev 1; Proposed plans 002 rev 3; Proposed plans and elevations 003 rev 4; Foul & Surface Water Drainage Design Drawing FRA 22 1125, Rev 2- Dated 01/2023 prepared by LK Group; updated Invasive Species Survey and Management Plan by LK Group, Job Number: IPM 22 1006 version 003 (received 15/9/23).

NOTES TO APPLICANT

- . INFORMATIVE - The Control of Noise Regulations 1975, Section 60. Control of Noise on Construction Sites

Works carried out in connection with the planning permission shall comply with the above regulations which require the following:

1. All works and ancillary operations which are audible at the boundary of the nearest house or noise receptor, or at such other place as may be agreed with the Council, shall be carried out only between the hours of 0800 and 1800 on Mondays to Fridays and between the hours of 0900 and 1400 on Saturdays and at no time on Sundays and Bank Holidays.
2. The best practicable means, as defined in section 72 of the Control of Pollution Act 1974, to reduce noise to a minimum shall be employed at all times.
3. All plant and machinery in use shall be properly silenced and maintained in accordance with the manufacturer's instructions.
4. Any emergency deviation from the above (1 - 3) shall be notified to Bury Council without delay.

Any contravention of these requirements will trigger the serving of a Notice under Section 60 of The Control of Noise Regulations 1975.

The applicant is advised to incorporate the flood resilience and resistance measures and sign up to the Met office Severe weather warning Service as recommended in the Flood Risk Assessment AEG0820_BL9-Bury-07 .

Coal Authority - General Information for the Applicant

Under the Coal Industry Act 1994 any intrusive activities, including initial site investigation boreholes, and/or any subsequent treatment of coal mine workings/coal mine entries for ground stability purposes require the prior written permission of The Coal Authority, since such activities can have serious public health and safety implications. Failure to obtain permission will result in trespass, with the potential for court action. Application forms for Coal Authority permission and further guidance can be obtained from The Coal Authority's website at:
www.gov.uk/get-a-permit-to-deal-with-a-coal-mine-on-your-property

Disclaimer

The consultation response is provided by The Coal Authority as a Statutory Consultee and is based upon the latest available data on the date of the response, and electronic consultation records held by The Coal Authority since 1 April 2013. The comments made are also based upon only the information provided to The Coal Authority by the Local Planning Authority and/or has been published on the Council's website for consultation purposes in relation to this specific planning application. The views and conclusions contained in this response may be subject to review and amendment by The Coal Authority if additional or new data/information (such as a revised Coal Mining Risk Assessment) is provided by the Local Planning Authority or the Applicant for consultation purposes.

In formulating this response The Coal Authority has taken full account of the professional conclusions reached by the competent person who has prepared the Coal Mining Risk Assessment or other similar report. In the event that any future claim for liability arises in relation to this development The Coal Authority will take full account of the views, conclusions and mitigation previously expressed by the professional advisers for this development in relation to ground conditions and the acceptability of development.

Whilst there is only a low risk of otter being present, the applicant is reminded that under the 2019 Regulation it is an offence to disturb, harm or kill otters. If an otter is found during the development all work should cease immediately and a suitably licensed ecologist employed to assess how best to safeguard the otter(s). Natural England should also be informed.

United Utilities response

The applicant can discuss any of the drainage works with Developer Engineer, Mohammed Aljafarawi, by email at wastewaterdeveloperservices@uuplc.co.uk. Please note, United Utilities is not responsible for advising on rates of discharge to the local watercourse system. This is a matter for discussion with the Lead Local Flood Authority and / or the Environment Agency (if the watercourse is classified as main river).

If the applicant intends to offer wastewater assets forward for adoption by United Utilities, their proposed detailed design will be subject to a technical appraisal by our Developer Services team and must meet the requirements outlined in 'Sewerage

Sector Guidance Appendix C – Design and Construction Guidance v2-2' dated 29 June 2022 or any subsequent iteration. This is important as drainage design can be a key determining factor of site levels and layout.

Acceptance of a drainage strategy does not infer that a detailed drainage design will meet the requirements for a successful adoption application. We strongly recommend that no construction commences until the detailed drainage design, has been assessed and accepted in writing by United Utilities. Any work carried out prior to the technical assessment being approved is done entirely at the developer's own risk and could be subject to change.

Management and Maintenance of Sustainable Drainage Systems

Without effective management and maintenance, sustainable drainage systems can fail or become ineffective. We believe we have a duty to advise the Local Planning Authority of this potential risk to ensure the longevity of the surface water drainage system and the service it provides to people. We also wish to minimise the risk of a sustainable drainage system having a detrimental impact on the public sewer network should the two systems interact. We therefore recommend the Local Planning Authority include a condition in any subsequent Decision Notice regarding a management and maintenance regime for any sustainable drainage system that is included as part of the proposed development. The following may be a useful example.

Prior to occupation of the development a sustainable drainage management and maintenance plan for the lifetime of the development shall be submitted to the local planning authority and agreed in writing. The sustainable drainage management and maintenance plan shall include as a minimum:

- a. Arrangements for adoption by an appropriate public body or statutory undertaker, or, management and maintenance by a resident's management company; and
- b. Arrangements for inspection and ongoing maintenance of all elements of the sustainable drainage system to secure the operation of the surface water drainage scheme throughout its lifetime.

The development shall subsequently be completed, maintained and managed in accordance with the approved plan.

Reason: To ensure that management arrangements are in place for the sustainable drainage system in order to manage the risk of flooding and pollution during the lifetime of the development.

Please note United Utilities cannot provide comment on the management and maintenance of an asset that is owned by a third party management and maintenance company and we would not be involved in the discharge of the management and maintenance condition in these circumstances.

UNITED UTILITIES PROPERTY, ASSETS AND INFRASTRUCTURE

Where United Utilities' assets cross the proposed red line boundary, developers must contact our Developer Services team prior to commencing any works on site, including trial holes, groundworks or demolition. Please see 'Contacts' section below.

Water pipelines

United Utilities will not allow building over or in close proximity to a water main.

United Utilities will not allow a new building to be erected over or in close proximity to a public sewer or any other wastewater pipeline. This will only be reviewed in exceptional circumstances.

Nb. Proposals to extend domestic properties either above, or in close proximity to a public sewer will be reviewed on a case by case basis by either by a building control professional or following a direct application to United Utilities (see our website for further details).

Public sewers cross the site. We require an access strip for maintenance or replacement of each sewer. The minimum distances that might be acceptable to United Utilities are detailed within Part H of the Building Regulations however, we recommend the applicant determines the precise location, size, depth and condition of each pipeline as this is likely to influence the required stand-off distance from any structure and/or whether diversion or building over might be considered.

Following our review of the proposed site layout, it appears that our required access to the 980*1170MM combined sewer is provided. This is based purely on the information contained within plan DRAWING No. GSS22015.3 / 004, Rev:2, Dated 14/02/2023. The acceptability of any proposal is dependent upon the applicant knowing the exact location (line and depth) of the asset in question, confirmed through their site specific investigations. The precise location of United Utilities assets is critical as this could be material to the detail of the final site design; including any proposed crossings of the asset with either above or below ground features (including utility services).

Important information regarding water and wastewater pipelines and apparatus
It is the applicant's responsibility to investigate and demonstrate the exact relationship between United Utilities' assets and the proposed development.

A number of providers offer a paid for mapping service, including United Utilities (see 'Contacts' section below). The position of the underground apparatus shown on water and wastewater asset maps is approximate only and is given in accordance with the best information currently available. Therefore, we strongly recommend the applicant, or any future developer, does not rely solely on the asset maps to inform decisions relating to the detail of their site and instead investigates the precise location of any underground pipelines and apparatus. United Utilities Water will not accept liability for any loss or damage caused by the actual position of our assets and infrastructure being different from those shown on asset maps.

Developer's should investigate the existence and the precise location of water and wastewater pipelines as soon as possible as this could significantly impact the preferred site layout and/or diversion of the asset(s) may be required. Unless there is specific provision within the title of the property or an associated easement, any necessary disconnection or diversion of assets to accommodate development, will be at the applicant/developer's expense. In some circumstances, usually related to the size and nature of the assets impacted by proposals, developers may discover the cost of diversion is prohibitive in the context of their development scheme.

Any agreement to divert our underground assets will be subject to a diversion application, made directly to United Utilities. This is a separate matter to the determination of a planning application. We will not guarantee, or infer acceptance of, a proposed diversion through the planning process (where diversion is indicated on submitted plans). In the event that an application to divert or abandon underground assets is submitted to United Utilities and subsequently rejected (either before or after the determination of a planning application), applicants should be aware that they may need to amend their proposed layout to accommodate United Utilities' assets.

Where United Utilities' assets exist, the level of cover to United Utilities pipelines and apparatus must not be compromised either during or after construction and there should be no additional load bearing capacity on pipelines without prior agreement from United Utilities. This would include sustainable drainage features, earth movement and the transport and position of construction equipment and vehicles.

Any construction activities in the vicinity of United Utilities' assets, including any

assets or infrastructure that may be located outside the applicant's red line boundary, must comply with national building and construction standards and where applicable, our 'Standard Conditions for Works Adjacent to Pipelines', a copy of which is available on our website. The applicant, and/or any subsequent developer should note that our 'Standard Conditions' guidance applies to any design and construction activities in close proximity to water pipelines and apparatus that are no longer in service, as well as pipelines and apparatus that are currently operational. It is the applicant's responsibility to ensure that United Utilities' required access is provided within any proposed layout and that our infrastructure is appropriately protected. The developer would be liable for the cost of any damage to United Utilities' assets resulting from their activity.

WATER AND WASTEWATER SERVICES

If the applicant intends to receive water and/or wastewater services from United Utilities they should visit our website or contact the Developer Services team for advice at the earliest opportunity. This includes seeking confirmation of the required metering arrangements for the proposed development. See 'Contacts' Section below.

If the proposed development site benefits from existing water and wastewater connections, the applicant should not assume that the connection(s) will be suitable for the new proposal or that any existing metering arrangements will suffice. In addition, if reinforcement of the water network is required to meet potential demand, this could be a significant project and the design and construction period should be accounted for.

In some circumstances we may require a compulsory meter is fitted. For detailed guidance on whether the development will require a compulsory meter please visit <https://www.unitedutilities.com/my-account/your-bill/our-household-charges-20212022/> and go to section 7.7 for compulsory metering.

To promote sustainable development United Utilities offers a reduction in infrastructure charges for applicant's delivering water efficient homes and draining surface water sustainably (criteria applies). For further information, we strongly recommend the applicant visits our website when considering any water or wastewater design
<https://www.unitedutilities.com/builders-developers/your-development/planning/building-sustainable-homes/>

Business customers can find additional information on our sustainable drainage incentive scheme at
<https://www.unitedutilities.com/Business-services/retailers/incentive-schemes/>
To avoid any unnecessary costs and delays being incurred by the applicant or any subsequent developer, we strongly recommend the applicant seeks advice regarding water and wastewater services, and metering arrangements, at the earliest opportunity. Please see 'Contacts' Section below.

CONTACTS

Website

For detailed guidance on water and wastewater services, including application forms and the opportunity to talk to the Developer Services team using the 'Live Chat' function, please visit:
<http://www.unitedutilities.com/builders-developers.aspx>

Email

For advice on water and wastewater services or to discuss proposals near to pipelines, email the Developer Services team as follows:

Water mains and water supply, including metering -
DeveloperServicesWater@uuplc.co.uk

Public sewers and drainage - WastewaterDeveloperServices@uuplc.co.uk
Telephone - 0345 072 6067

Property Searches (for asset maps):

A number of providers offer a paid for mapping service including United Utilities. For more information, or to purchase a sewer and water plan from United Utilities, please visit <https://www.unitedutilities.com/property-searches/>

Water and sewer records can be viewed for free at our Warrington Head Office by calling 0370 751 0101. Appointments must be made in advance. Public sewer records can be viewed at local authority offices. Arrangements should be made directly with the local authority.

. The applicant is advised to contact the Environment Agency with regards to flood risk mitigation measures -

Environment Agency

Richard Fairclough House Knutsford Road, Warrington, WA4 1HT.

Customer services line: 03708 506 506

www.gov.uk/environment-agency

. The applicant must be made aware of the need to safeguard people using public rights of way and that no public rights of way are damaged, widths altered, gates erected across their width (unless authorised by Bury Council the Highway Authority) or obstructed by any other means either during or as a result of development. The applicant must ensure that no changes to land levels/surface water runoff affects a public right of way. If a temporary obstruction of public rights of way is unavoidable, no development must take place until a temporary closure order has been made by Bury Council and a suitable temporary alternative route(s) made available.

. The applicant's attention is drawn to the existence of Public Right of Way No. 68, Bury, which abuts the private shared access to the site. No development should take place which affects the Right of Way in the absence of an appropriate closure or diversion order.

. The Council currently operates a curtilage system of refuse collection. The applicant is advised to liaise with Waste Management, Bradley Fold Depot on 0161 253 6621/7010, regarding the operation of this system.

Signed:
