Good evening Holly,

Further to our conversation earlier we can confirm the below - Shadbolt comments in red.

- *Watching brief to identify and deal with any previous unforeseen contamination at the site.*
This has been agreed with the client and a watching brief by a Shadbolt Group engineer will be maintained throughout the works for record keeping purposes and to advise on any previously unidentified contamination
- *Chemical testing results of any imported soil material for use in the small soft landscaped area to the rear of the extension to demonstrate that the material is suitable for use.*
Testing will be undertaken in accordance with YALPAG guidance.
- *Excess soil material to be disposed of at a suitable waste disposal facility.*
Rates have been agreed for WAC testing for off site disposal to a suitable facility and an MMP (materials management plan) will be in place to ensure waste material is dealt with in accordance with best practice.

Additionally a validation report for the MMP will be submitted along with a remediation validation report tying together the whole process.

Kindest regards

Rob

Ki
