

I have reviewed the Noise Impact Assessment along with the other supporting documentation and I have no objections from an Environmental Health perspective.

To reduce the risk of future noise complaints I would like to add the following recommendations:

Recommendations

1. Amplified music to be kept at background level at all times.
2. Ensure all windows and doors are kept closed in the evening hours until closing, to prevent noise breakout causing a disturbance to residents.
3. Follow all recommendations as specified in the Noise Impact Assessment.
