

Dear Jennie,

Re: **71783**

PVNF has considered this application, and whilst we don't have any objection in principle, there appears to be a scarcity of information on the treatment of Bury New Road elevation, including the proposed signage - we would wish to understand what is proposed regarding materials to be used, colors, size and if any lighting is to be installed

We look forward to hearing from you, we will provide a definitive response once we receive the additional information

Kind Regards

Carol
