

Method statement and Details of restoration

Concrete-framed car park decks to be pecked, cut-up and/or munched using large machines working at ground level, with all concrete rubble crushed on site and carted away for recycling; and metal re-bar separated for recycling.

All demolished material above ground to be removed and the subject yard area left flush. Tarmac top dressing to yard slab will be warmed, scraped and carted away by Contractor for recycling. Contractor will remove crushed concrete and separated metals for recycling off-site.
