

Good afternoon

Thank you for consulting the M&W Unit on the application below.

Due to the nature of this development, we have no comments to make in respect of the GM Joint Minerals Plan. Although the site is located within Minerals Safeguarding Areas, as noted in the Planning Statement, we have no objection to this development and support the comments made by the Coal Authority. If there are any further specific issues you would like to raise with us, then please do not hesitate to get in touch.

Regards,

GM Minerals & Waste Unit
