All relevant boundary positions are to be checked prior to proceeding

Building regulation drawings can be used for building estimates, however for an accurate quote builders must attend site as these drawings do not account for all aspects of the building works.

A line drawing of a house with a gabled roof, a chimney, and a small porch. The house is shown from a side profile, with the roofline and walls clearly defined. The chimney is located on the left side of the house, and the porch is on the right side. The drawing is simple and uses black lines on a white background.

A minimalist line drawing of a house. On the left is a smaller structure with a gabled roof and a garage door with horizontal slats. To its right is a taller section with a chimney on the roofline and a vertical window. The main part of the house on the right has a large, steep gabled roof and a tall, narrow vertical window. The drawing uses simple black outlines on a white background.

A line drawing of a two-story house. The house has a gabled roof. On the left side, there is a small square window on the ground floor and a larger double window on the second floor. In the center, there is a ground-floor door with a semi-circular transom and a second-floor window. On the right side, there is a large bay window on the second floor with a decorative pediment above it. The drawing is composed of simple black outlines on a white background.
