

APP 69837

A noise assessment has been carried out and the findings are that there would be no/low impact of noise to residents. I am unsure about the outside area for the dogs. Dog barking travels and there are a lot of nearby residential properties. It would be how this area is managed and prevention/reductio of dog barking. It also states that from the noise assessment it would be ok to keep the roller shutters up! Again internal dog barking and the close proximity to local residents.

Thanks
