

CTMP for 62 Starling Road

Access to the site will be at the point of the dropped kerb that is already in place leading onto the existing driveway which is constructed of concrete slabs which will enable any vehicles to keep their wheels clean so as to not cause dust, mud or debris being carried on vehicles wheels. Road signage will be displayed during working hours to warn drivers and pedestrians of possible construction traffic.

Any deliveries will be scheduled between 10am and 2pm where possible to reduce disruption at high traffic times.

Operatives will reverse any deliveries onto the site so materials can be offloaded, this will allow any vehicles to freely drive off the site with the assistance of an operative watching.

Working hours will be between 7am to 4pm Monday to Friday.

Operative vehicles will be parked on the existing driveway with no more than 2 vehicles being on site at a time.

The site has an existing front garden wall that will be retained and the existing opening will be open and closed daily using Heras fencing to keep the site secure.
