Heritage Statement

Date 13th October 2023
Client: Anne Botham
Site Ref: 1 The Stables, Scholes Lane
Post code M25 0NH

1 The Stables, has 7 windows that we propose to replace due to general deterioration.

Previously the homeowner had 2 round windows replaced by ourselves in 2018 that were breaking up into pieces when they were touched.

This proposal is to remedy these ongoing issues, bringing the standard and visual appeal of the windows, and property overall, back to its former glory.

Our proposal is to replace all 7 remaining windows, with the same style of window, using identical face dimensions as the existing section profiles.

The replacement windows will also locate into the same positions within the masonry aperture as per the existing.

The present windows hold no special significance to the buildings heritage because they are not the original windows.

The replacements are to be fully hand-made and constructed from the finest quality painted timbers, using traditional woodworking manufacturing skills ensuring that they shall be as original as possible and in-keeping overall with the buildings' heritage.

Similarly they will be in keeping with the neighboring properties, where we have already had experience working, with previous window replacements being conducted after obtaining the relevant listed building consents required.
