Parking – further information.

Further to your letter, reference number 70099 I am writing to inform you about the parking for the new building.

The nursery has been operating under myself for 6 years and 20 plus years before that, parents have always parked outside the nursery to drop their children off with no issues.

The new building has generated more spaces, however this has not created any parking issues as parents are dropping off and collecting at varying times, not all at the same time. Drop offs and collecting times are also very short so parents aren't parked up for long periods of time.

Also, the majority of our government funded children walk to nursery as they don't own cars.
