Subject: RE: Radcliffe Civic Hub - Additional Bat Emergence Survey

Hi Dean

Thanks for this, not leaving until after lunch so just checked my emails.

I have no reason to doubt the findings of the report. No further bats emergence surveys are required and the residual risk dealt with via an informative.

With regards bat activity along the River, this is relatively low as noted for the habitat and likely because of existing lighting. I would recommend that external lighting minimises further negative impacts on the River. This can be dealt with via condition.
