Policy

Policy JP-C2: Digital Connectivity within the "Places for Everyone" (PfE) Joint Development Plan for Greater Manchester aims to ensure the provision of affordable, high-quality digital infrastructure. It is a strategic policy framework that complements the National Planning Policy Framework (NPPF). This policy supports various measures, including enabling the rollout of latest generation mobile technology and facilitating affordable, high-speed internet access.

Proposal

The mosque members would have a close working relationships with developers to ensure the new development has future-ready digital infrastructure, including full fiber connections and multiple provider capacity. They will encourage local community involvement and collaboration with infrastructure providers to help identify specific needs and shape the connectivity. Mosque members will work with developers, telecommunications providers, and infrastructure installers to understand their needs and potential.
