

DESIGN AND ACCESS STATEMENT

Unsworth Primary School, Blackley Cl, Unsworth, Bury BL9 8LY.

PROJECT DETAILS

Proposed additional Staff Car-parking. 8 in total

Description

The school wish to extend their Car-Parking area by using part of the existing play area. There is currently an intermediate fence, separating the small area, which is to be dismantled, approximately 6 Metres wide.

The Car-park

The car-park area, which is to be extended, currently has a capacity of 32. The school hope to extend this to give an additional area of 25.5 x 13 Metres and thus provide a further 8 carpark spaces.

DESIGN

Amount/size

The car-park is to form an extra 280 Square Metres.

Access

Vehicular and Transport links

The Main entrances will not be altered so vehicular access will remain unchanged to both the front entrance area of the school and the car-park.

Inclusive Access

All existing pedestrian access will be maintained in the proposed scheme, which has previously been designed to allow proper access into and out of the main school building. All new pedestrian gates will be fully accessible exceeding the minimum width of 1.2m wide.

Given that the carpark has been changed to incorporate additional spaces the number of disabled spaces is to be increased from one to two spaces. If necessary to accommodate a disabled staff member, the school will also add further spaces.
