5G ROLL OUT PLANNING PRE-APPLICATION ENQUIRY - SITE DETAIL SHEET

Site Requirement

Site Introduction

Telecoms Planning Pre-Application
Enquiry for a proposed
telecommunications installation at:

**PIMHOLE, GIGG
BURY
GREATER MANCHESTER
BL9 7EB**

Site Objective

To provide the surrounding area with mobile coverage, while linking other sites into the wider Network. The site is part of a project to supply the surrounding area with 5G coverage. At present, there is a gap in network coverage within this particular area.

Preferred Site

Site Name

BRY21770 – HEYWOOD STREET

National Grid Reference

E: 381109 N: 410498

Traffic Light Model Rating

Amber

Assessment

In this instance, a new 'slim line' Streetpole with equipment cabinets as shown on the drawings, the existing street furniture within the vicinity which should soften any visual impact.

The equipment has been designed to create a minimal, modern telecoms installation, which is required to extend high-speed mobile coverage to the area in and around the area.

Equipment Details: -

Please refer to the planning drawings (enclosed)
BRY21770_BRY131_88063_BL0391_GA_REV_A

Figure 1 – Plot showing the required area to be covered, with a white tab showing the preferred location from a coverage perspective.

Figure 2 – An illustration of the intended search area, which has a 100-metre radius. The proposed site location is situated outside the 100m search area.

Figure 3 - Site Photograph: (approximate location of site)

Proximity of the site to schools?

The proposed location does appear to be within 350m of an education centre.

- St Maries R C Primary School

Proximity to airports?

Proposed location does not appear to be within 3km of an airport or aerodrome.

Airports with scheduled flights sorted by distance.					
Type	Airport Name	City	IATA Code	Connectivity	Distance
✗	Manchester Airport	Manchester	MAN	★★★★★	16.33 mi
✗	Liverpool John Lennon Airport	Liverpool	LPL	★★★★★	29.13 mi
Other airports without scheduled flights sorted by distance.					
Type	Airport Name	City	IATA Code	Connectivity	Distance
✗	Warton Airport	Warton		★★★★★	26.63 mi
✗	Leeds East Airport	Church Fenton		★★★★★	47.74 mi

Site description of Designated Search Area (DSA).

As this mast is a 5G installation, to work it needs to be close to those who will benefit from the technology, therefore a small search area is required. Movements outside this area are likely to require a proliferation of masts to do the same job, and even then, coverage gaps are likely. The search area is densely residential with unsuitable pavements.

Discounted Sites: List of other sites investigated within a 100m Search Area and why they have been discounted – area in general is a densely populated area with small streets and residential housing.

Site	NGR	Discounted Reason
D1 – Back Oxford Street	381228, 410330	Nominal location - very residential with insufficient pavements rest of the search area is the same.
D2 – Nuttall Street	381091, 410431	This option has been discounted due to unsuitable pavements and visibility splay issues.
D3 – Oxford Street	381168, 410359	This option has been discounted due to unsuitable pavements and the location is also in a residential area

D4 – Benson Street	381186, 410481	This option has been discounted due to unsuitable pavements and visibility splay issues.
D5 – Hurst Street	381257, 410521	This option has been discounted due to unsuitable pavements and visibility splay issues.
D6 - Oxford Street	381241, 410360	This option has been discounted due to unsuitable pavements and the location is also in a residential area

Legislation

Extracts have been taken from the Bury Metropolitan Borough Council
Highlighting the importance of up-to-date telecommunications/Connectivity.

Digital and Communications Infrastructure	Policy Direction IN3
It is proposed that the Local Plan should include a policy supporting the provision of enhanced electronic communications infrastructure and setting out the factors that will be taken into account in dealing with proposals for communications infrastructure.	

Justification

- 14.14 High quality electronic communications infrastructure, including high speed broadband access, is essential for developing a sustainable local economy and is important for education and enhances the provision of local community facilities and services. It is also vital for home working and helps to reduce the need to travel and to create more resilient rural communities as it enables more efficient working practices and provision of online facilities and services.
- 14.15 In terms of telecommunications infrastructure, it is proposed that the policy should specify that developers should aim to minimise the number of masts and explore the potential for utilising existing structures before considering the erection of a new mast. Where this is not possible and new equipment is required, the Council will expect this to be sympathetically designed and, where possible, camouflaged in order to minimise its visual impact.

Alternative Options

- 14.16 The Council has considered the alternative option to not include a specific policy setting out the approach to digital and communications infrastructure. However, this option was discounted on the basis that the NPPF states that advanced, high quality and reliable communications infrastructure is essential for economic growth and social well-being. Planning policies and decisions should support the expansion of electronic communications networks, including next generation mobile technology (such as 5G) and full fibre broadband connections. Policies should set out how high quality digital infrastructure, providing access to services from a range of providers, is expected to be delivered and upgraded over time; and should prioritise full fibre connections to existing and new developments.
- 14.17 It is considered that the omission of the policy could potentially prevent the necessary expansion of communications networks and lead to examples of unacceptable impacts arising from the unnecessary installation of new or poorly designed telecommunications infrastructure.
