Please note in regard to:

- Fire Statements - From 1 August 2021, planning applications for buildings of over 18 metres (or 7 stories) tall containing more than one dwelling will require a 'Fire Statement' for the application to be considered valid. There are some exemptions. View government planning guidance on fire statements or access the fire statement template and guidance.
- Permission In Principle - If you are applying for Technical Details Consent on a site that has been granted Permission In Principle, please include the relevant details in the description below.
- Public Service Infrastructure - From 1 August 2021, applications for certain public service infrastructure developments will be eligible for faster determination timeframes. See help for further details or view government planning guidance on determination periods.

Description

Please describe details of the proposed development or works including any change of use.

Milltown Street Cycle Bridge is to provide a crossing over the River Irwell for pedestrian and cycle traffic. It is intended as a replacement structure for Milltown Street Footbridge, a bridge that was extensively damaged by flood waters in the river in 2015. One of the two spans of the original footbridge has previously been removed in the interest of public safety, the second span is to be removed as part of the bridge replacement scheme. The proposed cycle bridge is to be located approximately 20m upstream of the existing footbridge.

The proposed structure is to be a two span painted steel truss bridge. The main span is approximately 42m in length from the west abutment/river bank, over the river to a new pier at the foot of the east river bank. The second span span being approximately 13m in length from the pier to the east abutment/river bank. The clear width of the bridge is to be a minimum of 3.5m.

The cycle bridge is to be at a raised height to the original footbridge to make it resilient to future high water levels in the river. This is to be achieved by using an existing embankment to the west side of the river and a ramped approach to the proposed bridge level on the east side of the river.

Has the work or change of use already started?

☐ Yes ☒ No

6. Existing Use

Please describe the current use of the site

The approach and abutment location on the west side of the river was an industrial area and is currently in a derelict state. The area is/was part of the previously demolished East Lancashire Paper Mill site. The area adjacent to Pioneer Mills on the east side of the river is a rough industrial storage area with a brick outbuilding. The area is within the flood levels of the river.

Is the site currently vacant?

☐ Yes ☒ No

Does the proposal involve any of the following? If Yes, you will need to submit an appropriate contamination assessment with your application.

Land which is known to be contaminated

☐ Yes ☒ No

Land where contamination is suspected for all or part of the site

☐ Yes ☒ No

6. Existing Use

A proposed use that would be particularly vulnerable to the presence of contamination ☐ Yes ☒ No

7. Materials

Does the proposed development require any materials to be used externally? ☒ Yes ☐ No

Please provide a description of existing and proposed materials and finishes to be used externally (including type, colour and name for each material):

Walls	
Description of existing materials and finishes (optional):	N/A
