Subject: RE: Initial Consultation on Planning Application 69184

Hi Dean

Please see my comments below.

CONTAMINATED LAND – CONDITIONS.

The site is currently vacant and was previously occupied by a detached residential property and garden known as The Mount. Adjacent land use includes housing with gardens. Previous land uses at the site have included agriculture, part of Hollins Mount Farm and buildings of unknown use. Previous land uses in the surrounding area have included farm buildings, a works, an electricity sub station, a grave yard, an infilled pond and a sewage works. The site does not lie within 250 metres of any known landfill sites and is not in close proximity to any major surface watercourses, although an unnamed land drain is located to the east. The site lies above glacial till over the Middle Coal Measures Secondary A aquifer.

The proposal is for the development of two dwellings.

Please be aware the Radon Maps have recently been updated and this site now falls into a level of higher risk that previously (5-10% chance of a house having a radon concentration at or above the Action Level of 200 Bq m³). Please consult the updated maps: [UKradon - UK maps of radon.](#)

A Preliminary Risk Assessment Report has been submitted, please find this Section's response attached.

In line with the National Planning Policy Framework, the site is proposed for a sensitive end use we recommend that the following contaminated land conditions are placed on any grant of permission:

CLA1 - Contaminated Land Preliminary Risk Assessment, Site Investigation, Detailed Risk Assessment and Remediation Strategy.

CLA2 - Contaminated Land implementation of Remediation Strategy and Site Verification Report.

Asbestos Condition - Prior to demolition of the structures on site an asbestos survey is to be carried out by an appropriately qualified contractor. Any asbestos identified shall be disposed of in an appropriate manner.

Reason: This is to secure the satisfactory development of the site in terms of human health, controlled waters and the wider environment and pursuant to the National Planning Policy Framework.

EV Charging provision – COMMENT

Bury Council has been identified by DEFRA as an area requiring to significantly improve air quality. The required measures to do this are currently under discussion. Due to this

requirement, and the requirements of the new building regulations (The Building Regulations 2010, Approved Document S, Infrastructure for the charging of electric vehicles), please supply details of the proposed provision for electric vehicle charging.

INFORMATIVE - The Control of Noise (Appeals) Regulations 1975, Section 60. Control of Noise on Construction Sites

Works carried out in connection with the planning permission shall comply with the above regulations which require the following:

1. All works and ancillary operations which are audible at the boundary of the nearest house or noise receptor, or at such other place as may be agreed with the Council, shall be carried out only between the hours of 0800 and 1800 on Mondays to Fridays and between the hours of 0900 and 1400 on Saturdays and at no time on Sundays and Bank Holidays.
2. The best practicable means, as defined in section 72 of the Control of Pollution Act 1974, to reduce noise to a minimum shall be employed at all times.
3. All plant and machinery in use shall be properly silenced and maintained in accordance with the manufacturer's instructions.
4. Any emergency deviation from the above (1 – 3) shall be notified to Bury Council without delay.

Any contravention of these requirements will trigger the serving of a Notice under Section 60 of The Control of Noise Regulations 1975.

Thank you
