

Thank you for the opportunity to comment on this application. Having looked at the documents provide for this application; there are additional concerns regarding the proposal which are not addressed within the supplied Crime Impact Statement.

- Lockers should be provided for staff to store their personal belongings whiles at work.
- All cycle stands should be U-profile or Sheffield style stands.
- All high value equipment (e.g. computers, projectors, flat screen monitors / televisions, tools etc.) should be property marked and securely fixed or stored to deter damage / theft. An accurate record should be maintained which logs all such items.
- The lower rungs of the external CAT ladder on the east elevation should be secured to prevent using them to access the roof.

If the Council approve this application, we would highly recommend the inclusion of a condition for the scheme to achieve Secured by Design (SBD) accreditation. The applicant should submit an SBD application as early as possible if the permission is granted to determine any other security requirement to achieve the award.

Best regards,
