Site Visit Records and Photographs

SITE VISIT RECORD

Site Name: Star Academy, Radcliffe
(Temps)

Job No: C5394

Engineer(s): Tim Mayall

Date of Visit: 30/07/2024

Visit Purpose: Inspect Topsoil and Quarried MOT Type 1 post-import to inform interim validation report for temporary accommodation.

Secondary visit purpose was a general site progress visit / MMP verification visit to view engineered fill in situ and review stockpile volumes.

Drawing detailing current stockpile locations and other observations made during the site visit:

Stockpiles inspected:

- Imported topsoil – approximately 16m³ (1 load delivered on 29/07/24). From discussions with Chartrange a further 2 loads are due to be delivered for all soft landscaping – no subsoil being used within the temporary accommodation.
Topsoil described as a dark brown fine to coarse sand topsoil with fine rootlets with no evidence of contamination, no anthropogenic constituents.
TM satisfied that topsoil matches description within the laboratory testing report and associated

CMR 04	0.1	Nov 18

certification provided by Tim O'Hare Associates.

2. Imported DOT Type 1 – approximately 15m³, confirmed clean, quarried limestone by visual inspection. No anthropogenic constituents. Being used as sub-base for footpaths and proposed hard standing.
3. Site won 6F2 – dimensions equate to 1760m³ (likely significant overestimate, more realistic estimate is circa 800-1000m³ due to irregular shape and spalling of sides). For re-use as general fill across external areas, works ongoing.
4. Surplus made ground, for offsite disposal.

Other elements inspected include proposed new planting areas which have been dug down by at least 450mm to accommodate new planters. There is a further area of new soft landscaping which will comprise new hedge planting along the south-western boundary – this area has been significantly overdug to circa 600-800mm below ground level.

Contractor Chartrange is aware of the cover system requirements – 450mm underlain by barrier membrane.
