

Thank you for seeking the views of Design for Security on the above application. We typically wouldn't support/object unless there was an overwhelming body of evidence that it would be detrimental to the local area. Having reviewed the drawings submitted for this planning application, I have no major concerns. However, I have the following comments for consideration.

- To reduce the possibility of issues with the local residents. I have noted that there is off road parking at the front of the property. A commitment to parking in this car parking area would reduce the potential for conflict.
- A temporary permission would allow the operation of the home and any issues to be evaluated further down the line.
- Any alterations to the property should be to the Secure by Design standards.

Best regards,

Matt Granelli
