

## **Stand Golf Club, Whitefield Response to Comments from Bury Council**

### **Introduction**

1. BTG Eddisons has been instructed by Westshield Ltd to advise on the traffic and transport issues relating to a planning application for redevelopment at Stand Golf Club in the Whitefield area of Bury.
2. A planning application (App Ref No: 72578) has been submitted for the re-location of the clubhouse from Ashbourne Grove (Site A) to land to east of Ringley Road (Site B), and the erection of 45 no. dwellings and 60 no. retirement-living apartments in Site A. This was accompanied by a Transport Assessment (TA).
3. Comments on the application have been provided by the highway authority and the following provides a response to the comments raised.

### **Comments**

4. Comment: *A demonstration that the proposed vehicle parking and management is adequate to support both football and golf visitors.*
5. The TA included, at Section 4.10, an assessment of the potential parking demand associated with the golf course and football pitch; this concluded that sufficient parking was proposed to accommodate the likely demand. Parking is considered further later in this note.
6. Comment: *Visibility splays and forward visibility envelopes need to be plotted on the detailed plan in accordance with the guidance in Manual for Streets at all existing and new junctions and bends. There should be not obstructions to visibility above the height of 0.6m within them (including highway trees that are protected). Due to the intensification of use of the junction onto Ashbourne Grove proposed, this point will determine the best access position (notwithstanding the existing golf club access that exists at present and junction position currently proposed). The holding position of the Highway Authority is that no healthy trees should be removed to facilitate a new development.*
7. The highway authority has requested that visibility splays and forward visibility envelopes be plotted in accordance with the guidance in Manual for Streets.

8. It is first worth stating that Manual for Streets 2 advises at paragraph 10.7.2 that:

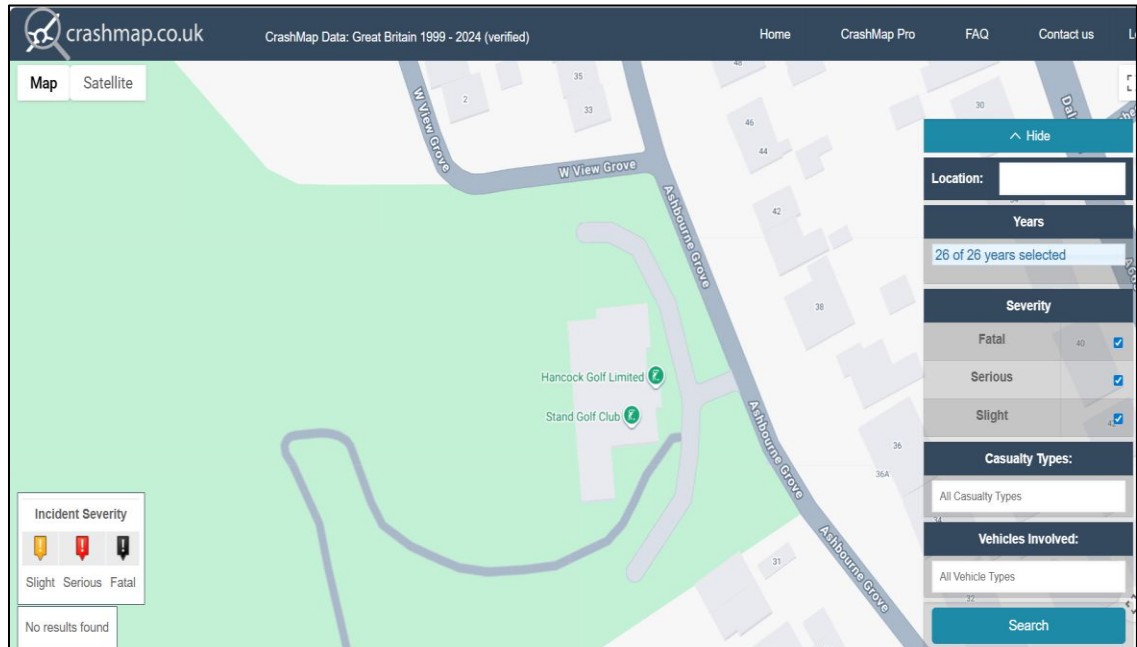

*'The impact of other obstacles, such as street trees and street lighting columns, should be assessed in terms of their impact on the overall envelope of visibility. In general, occasional obstacles to visibility that are not large enough to fully obscure a whole vehicle or a pedestrian, including a child or wheelchair user, will not have a significant impact on road safety.*

9. A consideration of the existing trees that align Ashbourne Grove confirms that the trunks are relatively modest in diameter (see Google Earth extract, below). As such, it is not considered that the presence of these will have a significant impact on road safety and appropriate visibility splays, i.e. 2.4m x 43m, can be achieved.

**Image 1 Extract from Google Earth**

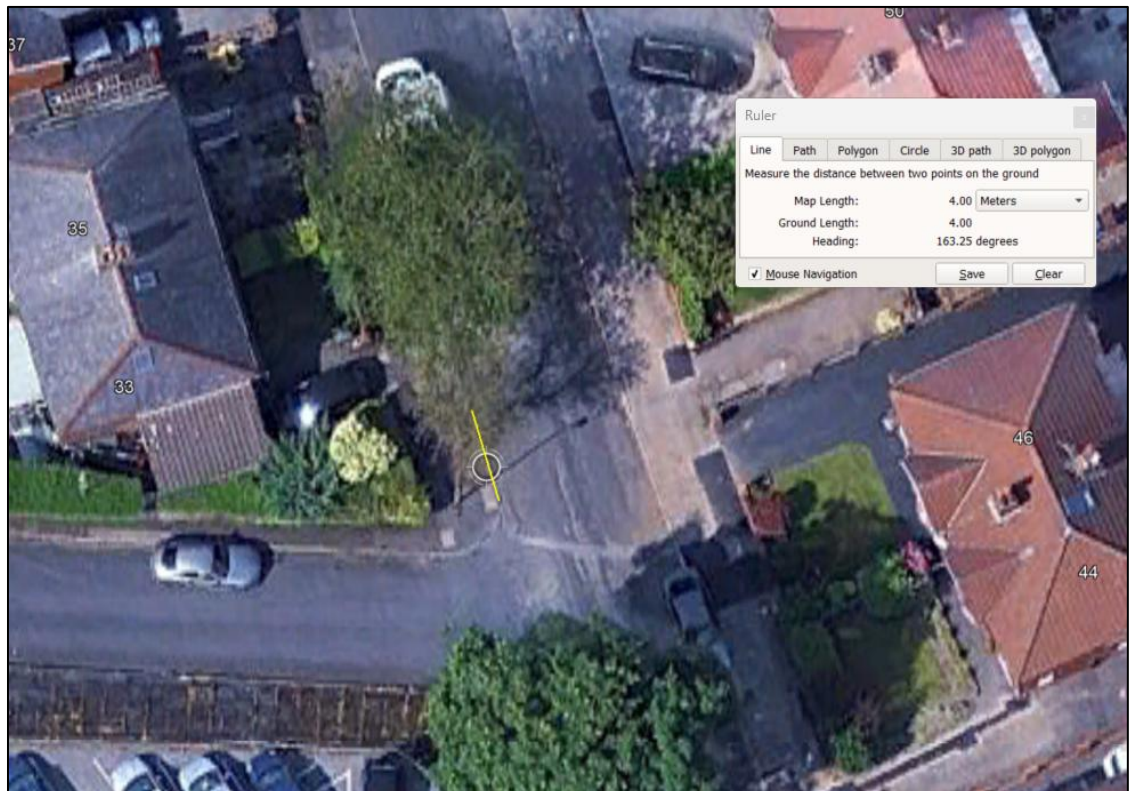

10. Indeed, given that the proposed access is in the same location of the existing golf club access and given no accidents have occurred in the vicinity of the access over the 26 years for which accident data is available within CrashMap (see extract, below), it is demonstrably the case that the location and proximity of the trees does not have a negative impact on highway safety.

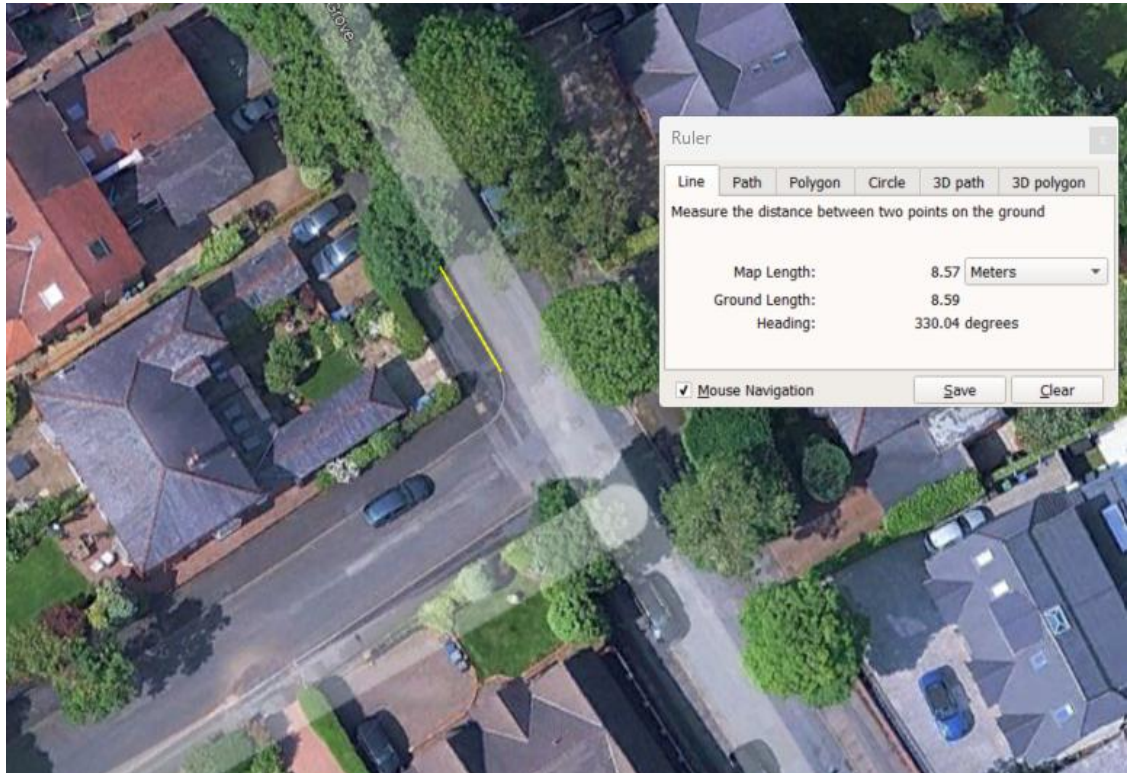

**Image 2 Extract from CrashMap for Existing Golf Club Access**

11. It is noted that the highway authority has stated that their holding position is that no healthy trees should be removed to facilitate a new development. In this regard, it is acknowledged that the tree immediately to the north of the proposed access off Ashbourne Grove would be removed as part of the access design submitted to date.
12. In order to avoid this, the size of the junction radii have been reduced to 4.5m. The proposed site access design is included at **Appendix 1**.
13. A plan showing the visibility within the site is included at **Appendix 2**.
14. Comment: *Visibility of approaching vehicles from the plots on the southerly side of the bend on West View Grove is sub-standard.*
15. It is understood that this relates to the visibility available to from the driveways associated with plots 1-4. In order to address this comment, a 2.0m footway has now been provided along the frontage of these plots, therefore facilitating an x-distance of 2.0m out of the driveways (which accords with Manual for Streets, which states at para 7.7.7 that '2m may be considered in some very lightly-trafficked and slow-speed situations').

16. Comment: *Driveways are located too close to the West View Grove/Ashbourne Grove and new access/Ashbourne Grove junctions.*
17. Whilst the response does not explicitly identify which driveways are of concern, it is assumed that the comment relates to plot 4 and plot 7.
18. With regard to plot 7, the reduction of the site access radii (as referred to above) increases the distance from the tangent point to the southern boundary of the driveway to circa 8m. Similarly, the distance from the tangent point of the southern radius of the Ashbourne Grove/West View Grove junction is also circa 8m from the eastern boundary of the driveway of plot 4.
19. These distances are not uncommon and, indeed, examples of similar distances can be observed in the immediate vicinity of the site. The distance of the driveway of property 33 Ashbourne Grove (immediately north of West View Grove) is circa 4m from the radius tangent (see Image 3), whilst property 1 Ashbourne Grove is around 8.5m north of the radius tangent from Delamere Avenue (see Image 4).

**Image 3 Existing Driveway of Property 33 Ashbourne Grove**

**Image 4 Existing Driveway of Property 1 Ashbourne Grove**

20. As such, with the proposed amendments to the site access junction radii, it is considered that the driveways of the plots along Ashbourne Grove and West View Grove have sufficient distance from junctions and will not result highway safety issues.
21. Comment: *The turning head, along with all footway and carriageway widths, need to be dimensioned.*
22. A drawing showing dimensions is included at **Appendix 3**.
23. Comment: *The turning head should be tracked by the Council's refuse vehicle (see attached guidance from Waste Management).*
24. A swept path analysis has been undertaken based on the amended layout using the 11.85m vehicle specified in Bury Council's 'Guidance to Refuse Collection Requirements and Storage', which confirms the vehicle can manoeuvre into and out of the access and within the site. This is included at **Appendix 4**.

25. Comment: *Parked vehicles on the inside of the bend of the new estate road would restrict forward visibility and visibility from the proposed driveways and needs to be reviewed.*
26. Plots 9 – 13 are located on the inside of the bend of the new estate. Plots 9 and 10 will result in a row of four spaces. The distance between the end of the western spaces of plot 10 and the space of plot 11 is circa 9.0m, but each private drive will have a dropped kerb and transition kerbs, which will severely restrict the available distance over which a car can park.
27. Similarly, the distance between the end of the western spaces of plot 11 and the space of plot 12 is circa 6.0m, but again each private drive will have a dropped kerb and transition kerbs, which will effectively preclude the parking of a car between these plots.
28. As such, the opportunity and likelihood of cars parking on the inside of the bend is very limited. However, notwithstanding this, the provision of bends within residential development is entirely common and is not considered that this layout is in any way unusual.
29. TfGM Comment: *No analysis of accident data has been undertaken, which should be provided. The area has a high number of road traffic incidents in recent years, particularly on Radcliffe Road, Ringley Road and Bury New Road.*
30. In order to address this comment, consideration has been given to historical accident statistics available on the CrashMap website. These are summarised in **Appendix 5**.
31. A number of accidents have occurred on the local highway network, however, this is not unexpected given the high volumes of traffic that utilise Bury New Road in particular.
32. With this in mind, and given the limited levels of traffic associated with the proposed development, it is not considered that proposals will have a material impact on highway safety.
33. Comment: *The following parking should be provided for site B:*
- *1 space per 2 people expected to use the facility at any one time (typical peak occupancy). Should be assessed separately for golf and football use*
  - *6% of capacity or 3 spaces whichever is greater for disabled parking.*
  - *Parking proposed for club house appears excessive - TA suggests 88 spaces required for max capacity so how are the additional 38 spaces essential for a GB development?*

34. The calculation included within the TA was carried out to demonstrate that sufficient car parking would be available and that overspill on the local highway would be avoided. This was carried out by determining the maximum occupancy derived from surveys of other golf courses and football pitches and determined that 88 spaces (72 spaces associated with the golf club and 16 spaces associated with the football pitch) would be occupied.
35. It is, however, important to recognise that the Club House will include function space (a function room of 168sqm and a function terrace of 125sqm). Clearly, this element could result in an additional requirement for car parking.
36. In order to provide an indication of the potential demand for parking that may occur as a result of this element, reference has been made to the 'Food & Drink – Banqueting Centre' use within the TRICS database. The full output is provided at **Appendix 6**.
37. Applying the trip rates established from the interrogation to the proposed function space of 293sqm, a parking accumulation can be derived. This is included at **Appendix 7** and indicates that the function space could result in a maximum parking accumulation of 23 vehicles.
38. When added to the maximum occupancy associated with the golf course and football pitch (88 spaces), the potential maximum accumulation at the site would be 111 vehicles.
39. However, in car parking design, the 'practical design capacity' is generally taken as the maximum level of occupancy a car park can operate at efficiently, without excessive congestion, queuing, or driver frustration, and this is commonly considered to be circa 85%.
40. Based on the total proposed parking provision of 126 spaces, the maximum accumulation of 111 vehicles will result in a maximum occupancy/capacity ratio of 88%, therefore providing sufficient parking to avoid overspill onto the local highway network but avoiding excessive congestion, queuing, etc.
41. As such, the proposed level of car parking is considered appropriate.

## Summary

42. This note has considered comments raised by BMBC regarding a planning application for redevelopment at Stand Golf Club in the Whitefield area of Bury.
43. Based on the additional information provided, the proposals should now be considered acceptable in highway terms.

## **APPENDIX 5**

### **Accident Analysis**

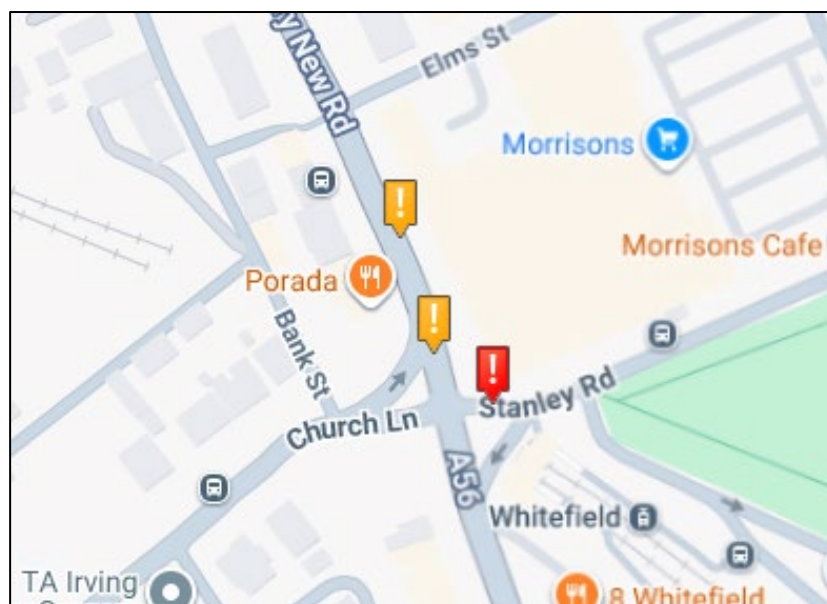

## Stand Golf Club, Whitefield Consideration of Accidents

1. In order to consider the potential impact of the development on road safety, a review of the CrashMap website ([www.crashmap.co.uk](http://www.crashmap.co.uk)) has been undertaken.
2. Consideration has been given to the most recent five-year period available (2020 to 2024) for sections of Radcliffe New Road, Bury New Road and Ringley Road.
3. According to the data provided there have been a total of 31 recorded accidents within the study area. These are summarised as follows.

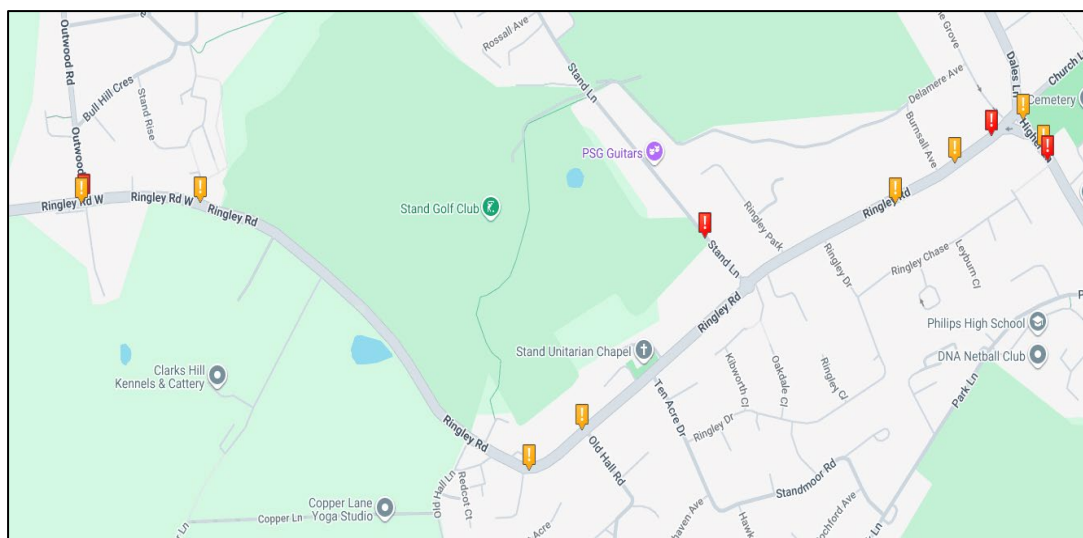

### Radcliffe New Road between Hollinhurst Road and Bury New Road

### Bury New Road/Church Lane Junction

## Ringley Road between Higher Lane and Outwood Road

4. The full accident data is attached, with a summary being provided in Table A, below.

| Date                                                    | Severity | Light Conditions               | Weather                    | Road Conditions | Manoeuvre                                                                 |
|---------------------------------------------------------|----------|--------------------------------|----------------------------|-----------------|---------------------------------------------------------------------------|
| <b>Radcliffe New Road to the Bury New Road Junction</b> |          |                                |                            |                 |                                                                           |
| 08/01/2021                                              | Slight   | Daylight                       | Fine                       | Dry             | Vehicle collides with another vehicle while in the process of turning     |
| 06/01/2022                                              | Slight   | Daylight                       | Raining without high winds | Wet/damp        | Vehicle collides into parked car and creates small pile up                |
| 15/01/2022                                              | Slight   | Daylight                       | Fine                       | Dry             | Vehicle is moving off and then collides with cyclist                      |
| 08/04/2022                                              | Serious  | Daylight                       | Fine                       | Dry             | Vehicle collides with pedestrian crossing on pedestrian crossing facility |
| 13/05/2022                                              | Slight   | Darkness Street lights Present | Fine                       | Dry             | Vehicle collides into the back of suddenly stopped vehicle                |
| 18/06/2022                                              | Slight   | Daylight                       | Fine                       | Dry             | Vehicle collides with another vehicle while in the process of turning     |
| 23/07/2022                                              | Serious  | Darkness Street lights Present | Raining without high winds | Wet/damp        | Vehicle Collides with a wall or fences                                    |
| 30/01/2023                                              | Slight   | Daylight                       | Fine                       | Dry             | Vehicle collides into the back of suddenly stopped vehicle                |
| 07/03/2023                                              | Serious  | Daylight                       | Fine                       | Dry             | Vehicle collides with pedestrian when turning left into a junction        |
| 15/03/2023                                              | Fatal    | Daylight                       | Fine                       | Wet/ damp       | Vehicle collides with pedestrian when in the act of turning left          |

|             |         |                                |                            |          |                                                                                                   |

| 31/10/2024 | Slight  | Daylight                       | Fine                       | Dry      | Vehicle collides into the front of a parked car                                   |
| 05/11/2024 | Serious | Darkness Street lights Present | Fine                       | Wet/damp | Vehicle collides with pedestrian in centre of carriageway not on a central island |

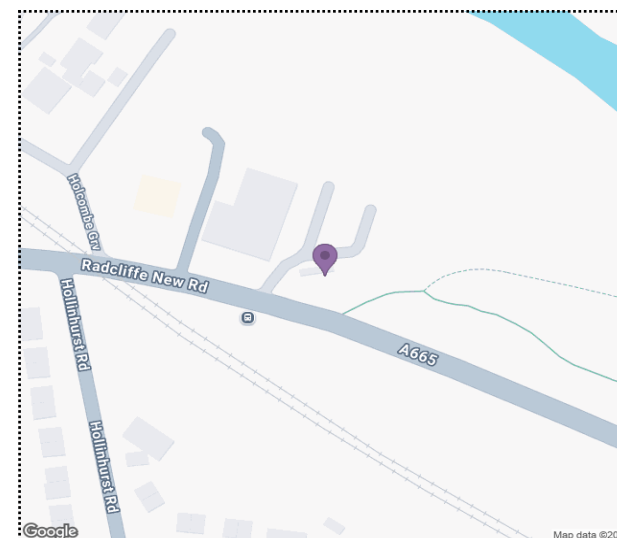

**Table A Accident Summary**

5. Whilst a number of accidents have occurred within the study area, this is not unusual given the volumes of traffic that use the network, Furthermore, a consideration of the accidents indicates that these occurred as a result of errors in judgement by the drivers/road users rather than any particular engineering issues or problems with the road network or junction layouts.
6. It is not considered that the proposals will change the characteristics of the surrounding highway network and as such will not have a detrimental impact on overall road safety.

## **APPENDIX 6**

### **TRICS Output – Function Suite**

Audit Code: 5760a9ae-8e73-4dce-91e1-bfef6af056de

TRIP RATE CALCULATION SELECTION PARAMETERS:

Land Use: 06 - HOTEL, FOOD & DRINK

Category: L - BANQUETING CENTRE

Selected Vehicle Type: Total Vehicles

Selected regions and areas:

|    |                                |                 |       |
|----|--------------------------------|-----------------|-------|
| 02 | SOUTH EAST                     |                 |       |
|    | KC                             | KENT            | 1 day |
| 06 | WEST MIDLANDS                  |                 |       |
|    | WM                             | WEST MIDLANDS   | 1 day |
| 07 | YORKSHIRE & NORTH LINCOLNSHIRE |                 |       |
|    | NY                             | NORTH YORKSHIRE | 1 day |
| 11 | SCOTLAND                       |                 |       |
|    | EA                             | EAST AYRSHIRE   | 1 day |

This section displays the number of survey days per TRICS® sub-region in the selected set.

Audit Code: 5760a9ae-8e73-4dce-91e1-bfef6af056de

## Primary Filtering Selection:

*This data displays the chosen trip rate parameter and its selected range. Only sites that fall within the parameter range are included in the trip rate calculation.*

|                         |                         |
|-------------------------|-------------------------|
| Parameter:              | GFA                     |
| Actual Range:           | 251 to 2040 (units:sqm) |
| Range Selected by User: | 251 to 2040 (units:sqm) |
| Parking Spaces Range:   | 47 - 76                 |

## Public Transport Provision:

|               |                      |
|---------------|----------------------|
| Selection by: | All Surveys Included |
| Date Range:   | 13/05/22 to 05/10/24 |

*This data displays the range of survey dates selected. Only surveys that were conducted within this date range are included in the trip rate calculation.*

## Selected survey days:

|          |        |
|----------|--------|
| Saturday | 4 days |
|----------|--------|

*This data displays the number of selected surveys by day of the week.*

## Selected survey types:

|                     |   |
|---------------------|---|
| Manual count        | 4 |
| Direction ATC Count | 0 |

*This data displays the number of manual classified surveys and the number of unclassified ATC surveys, the total adding up to the overall number of surveys in the selected set. Manual surveys are undertaken using staff, whilst ATC surveys are undertaken using machines*

## Selected Locations:

|                     |        |
|---------------------|--------|
| Edge of Town Centre | 1 days |
| Free Standing       | 2 days |
| Suburban Area       | 1 days |

*This data displays the number of surveys per main location category within the selected set. The main location categories consist of Free Standing, Edge of Town, Suburban Area, Neighbourhood Centre, Edge of Town Centre, Town Centre and Not Known.*

## Selected Location Sub Categories:

|                 |        |
|-----------------|--------|
| No Sub Category | 2 days |
| Out of Town     | 2 days |

*This data displays the number of surveys per location sub-category within the selected set. The location sub-categories consist of Commercial Zone, Industrial Zone, Development Zone, Residential Zone, Retail Zone, Built-Up Zone, Village, Out of Town, High Street and No Sub Category.*

## Inclusion of Servicing Vehicle Counts:

|                             |        |
|-----------------------------|--------|
| Servicing vehicles Excluded | 1 days |
| Servicing vehicles Included | 2 days |
| Servicing vehicles Unknown  | 1 days |

Audit Code: 5760a9ae-8e73-4dce-91e1-bfef6af056de

---

Secondary Filtering Selection:

Use Class:

N/A

4 surveys

*This data displays the number of surveys per Use Class classification within the selected set. The Use Classes Order (England) 2020 has been used for this purpose, which can be found within the Library module of TRICS®.*

Population within 500m Range:

2 - 5723

Population within 1 mile:

|                  |           |
|------------------|-----------|
| 1,000 or Less    | 2 surveys |
| 15,001 to 20,000 | 1 surveys |
| 25,001 to 50,000 | 1 surveys |

*This data displays the number of selected surveys within stated 1-mile radii of population.*

Population within 5 miles:

|                    |           |
|--------------------|-----------|
| 250,001 to 500,000 | 1 surveys |
| 5,001 to 25,000    | 2 surveys |
| 500,001 or More    | 1 surveys |

*This data displays the number of selected surveys within stated 5-mile radii of population.*

Car ownership within 5 miles:

|            |           |
|------------|-----------|
| 0.6 to 1.0 | 1 surveys |
| 1.1 to 1.5 | 3 surveys |

*This data displays the number of selected surveys within stated ranges of average cars owned per residential dwelling, within a radius of 5-miles of selected survey sites.*

Audit Code: 5760a9ae-8e73-4dce-91e1-bfef6af056de

---

Petrol filling station:

*This data displays the number of surveys within the selected set that include petrol filling station activity, and the number of surveys that do not.*

Travel Plan:

No 4 surveys

*This data displays the number of surveys within the selected set that were undertaken at sites with Travel Plans in place, and the number of surveys that were undertaken at sites without Travel Plans.*

PTAL Rating:

No PTAL Present 4 surveys

*This data displays the number of surveys within the selected set that include petrol filling station activity, and the number of surveys that do not.*

COVID-19 Restrictions:

No

| 18:00-19:00         | 4        | 1048     | 0.310    | 0.406      | 0.716  |
| 19:00-20:00         | 4        | 1048     | 0.525    | 1.050      | 1.575  |
| 20:00-21:00         | 4        | 1048     | 0.191    | 1.384      | 1.575  |
| 21:00-22:00         | 4        | 1048     | 0.310    | 0.668      | 0.978  |
| 22:00-23:00         | 4        | 1048     | 0.119    | 0.358      | 0.477  |
| 23:00-00:00         | 3        | 1174     | 0.199    | 1.363      | 1.562  |
| <b>Total Rates:</b> |          |          | 13.435   | 9.268      | 22.703 |

This section displays the trip rate results based on the selected set of surveys and the selected count type (shown just above the table). It is split by three main columns, representing arrivals trips, departures trips, and total trips (arrivals plus departures). Within each of these main columns are three sub-columns. These display the number of survey days where count data is included (per time period), the average value of the selected trip rate calculation parameter (per time period), and the trip rate result (per time period). Total trip rates (the sum of the column) are also displayed at the foot of the table.

To obtain a trip rate, the average (mean) trip rate parameter value (TRP) is first calculated for all selected survey days that have count data available for the stated time period. The average (mean) number of arrivals, departures or totals (whichever applies) is also calculated (COUNT) for all selected survey days that have count data available for the stated time period. Then, the average count is divided by the average trip rate parameter value, and multiplied by the stated calculation factor (shown just above the table and abbreviated here as FACT). So, the method is:  $COUNT/TRP*FACT$ . Trip rates are then rounded to 3 decimal places.

**Parameter Summary:**

|                                               |                         |
|-----------------------------------------------|-------------------------|
| Trip rate parameter range selected:           | 251 - 2040 (units: sqm) |
| Survey date date range:                       | 03/06/2023 - 05/10/2024 |
| Number of weekdays (Monday-Friday):           | 0                       |
| Number of Saturdays:                          | 4                       |
| Number of Sundays:                            | 0                       |
| Surveys automatically removed from selection: | 0                       |
| Surveys manually removed from selection:      | 0                       |

*This section displays a quick summary of some of the data filtering selections made by the TRICS® user. The trip rate calculation parameter range of all selected surveys is displayed first, followed by the range of minimum and maximum survey dates selected by the user. Then, the total number of selected weekdays and weekend days in the selected set of surveys are shown. Finally, the number of survey days that have been manually removed from the selected set outside of the standard filtering procedure are displayed.*
