

Heritage Statement

The proposal involves the installation of two non-illuminated, double-sided hanging signs to the front elevation of The Met and the addition of vinyl graphics to the café and bar windows at ground level.

The signs will be attached to existing frameworks that were fixed to the building during the Millennium as part of Bury Council's Britain in Bloom initiative. The new signage simply utilises these existing structures. The signage has been designed to be sympathetic to the building's Grade II listed character, using a neutral colour palette and modest scale to complement the existing façade. All elements are fully reversible should they be removed in the future.

The proposed works will preserve the special architectural and historic interest of the listed building and will have no adverse visual or physical impact on its appearance or setting within the wider conservation area.
