

NOTICE OF REFUSAL OF PLANNING PERMISSION

Town and Country Planning Act 1990 Town and Country Planning (Development Management Procedure) (England) Order 2015

To:

Mr Lee Greenwood
Connollys
Kingfisher Business Centre
Burnley Road
Rawtenstall
BB4 8EQ

On Behalf Of:

Mr Jeffrey Paul Speak
c/o agent

PART 1 - Particulars of Application

Application Number: 72796

Date of Registration: 02/02/2026

Proposal:

Application for permission in principle for
erection of 9 no. dwellings

Location:

Land off Holcombe Grove/ South East Side
Of Milltown Street, Radcliffe, Manchester
M26

PART 2 - Particulars of Decision

The Bury Metropolitan Borough Council hereby give notice in pursuance of the provisions of the Town and Country Planning Act 1990 that permission has been **REFUSED** for the carrying out of the development referred to in Part 1 hereof for the following reasons:-

The proposed development for 9 no dwellings on a 0.4 hectare site would not make optimal use of the potential of the site. Therefore, the proposed development would conflict with Policy JP-H4 of the Places for Everyone Joint Development Plan and Chapter 11, particularly paragraph 130 of the National Planning Policy Framework.

The following policies of the Bury Unitary Development Plan, National and Regional Government were considered relevant:

- H1/2 H1/2 - Further Housing Development
- H2/1 H2/1 - The Form of New Residential Development
- H2/2 H2/2 - The Layout of New Residential Development
- EN1/2 EN1/2 - Townscape and Built Design
- EN6/4 EN6/4 - Wildlife Links and Corridors
- EN7/2 EN7/2 - Noise Pollution
- EN7/5 EN7/5 - Waste Water Management
- OL5/2 OL5/2 - Development in River Valleys
- HT2/4 HT2/4 - Car Parking and New Development
- HT5/1 HT5/1 - Access For Those with Special Needs
- SPD6 Supplementary Planning Document 6 - Alterations and Extensions to Residential Properties.
- SPD11 Development Control Policy Guidance Note 11 - Parking Standards in Bury

JP-C2	Digital Connectivity
JP-C5	Streets For All
JP-C6	Walking and Cycling
JP-C8	Transport Requirements of New Development
JP-G8	A Net Enhancement of Biodiversity and Geodiversity
JP-H3	Type, Size and Design of New Housing
JP-H4	Density of New Housing
JP-P1	Sustainable Places
JP-S1	Sustainable Development
JP-S2	Carbon and Energy
JP-S4	Flood Risk and the Water Environment
JP-S1	Sustainable Development
JP-S5	Clean Air
NPPF	National Planning Policy Framework

This decision relates only to the Town and Country Planning Acts and does not include any consent or approval under any other enactment or under the Building Regulations. Any other consent or approval which is necessary must be obtained from the appropriate authority.

Applicant Plan Numbers:

Revised location plan received 11/2/26

NOTES TO APPLICANT

Local Highway Authority response

The LHA would recommend refusal for the following reason -

The proposal and cumulative pedestrian and vehicle traffic generated would result in the intensification of use of the unadopted site access (Holcombe Grove) that is substandard in terms of pedestrian facilities, widths and forward visibility for the number of dwellings now proposed to be served, significantly in excess of the original highway design parameters, which is likely to lead to pedestrian and vehicular conflicts on the access road and at the junction of Holcombe Grove with New Road to the detriment of the free flow of traffic and road and pedestrian safety.

Environmental Health Contaminated Land response

Would recommend that the following contaminated land conditions are placed on any grant of permission:

Contaminated land condition 01: site characterisation & risk assessment

Contaminated land condition 02: remediation strategy & verification plan

Contaminated land condition 03: remediation & verification

Reason: To prevent unacceptable risk to Human Health and Controlled Waters and to prevent pollution of the environment in accordance with the aims and Paragraphs 187(f), 196 and 197 of the National Planning Policy Framework (December 2024).

If permission is granted, in order for this Section to be satisfied that this development does not pose a risk to human health or the environment, the following information needs to be submitted to the Council for approval:

- (i) A preliminary risk assessment.
- (ii) A site investigation and risk assessment report.
- (iii) A detailed remediation strategy and validation plan.
- (iv) A materials management plan, if the CL:AIRE Definition of Waste Code of Practice is to be used.
- (v) After completion of site works, a verification report is required to validate that the work undertaken conforms to the remediation proposals received and agreed by this Section.

Environmental Health Air Quality response

The site is not located within an Air Quality Management Area. Due to the scale of the development, it is considered unlikely that the development would create an increase of more than 500 AADT (annual average daily traffic). Therefore, in line with the Planning Practice Guidance-Air Quality and EPUK Guidance, an air quality assessment will not be required.

Bury Council has been identified by DEFRA as an area requiring to significantly improve air quality. To support the principles of the Greater Manchester Clean Air Plan in reducing levels of nitrogen dioxide and in order to manage current and future levels of air pollution Bury Council is encouraging the use of cleaner vehicles. As such and in line the requirements of the Building Regulations (The Building Regulations 2010, Approved Document S, Infrastructure for the charging of electric vehicles), this Section recommends the following condition to be placed on any grant of permission:

AQ01 - Air quality condition 01: electric vehicle charge points

Reason: To encourage the uptake of ultra-low emission vehicles and ensure the development is sustainable and to safeguard residential amenity, public health and quality of life with respect to Local Air Quality, in accordance with paragraphs 112e, 117e, 187e and 199 of the National Planning Policy Framework (December 2024) and Places for Everyone Policy JP-S5 (Clean Air).

If permission is granted, the following information will be required:

- (i) Details of the proposed EV charging points to be installed including the information sheet detailing the make and model, to demonstrate that they meet the required specification.
- (ii) Evidence of the installation of the chosen EV charging points, such as photographs.

United Utilities response

Directed by the principles set out in the National Planning Practice Guidance and the new National Standards for Sustainable Drainage Systems (2025) we require developers and Local Planning Authorities, to do all that they can to avoid surface water entering the public sewer, unless absolutely necessary. This applies to all proposed development. See Appendix 1.1 'Surface Water Hierarchy'. All options for the sustainable management of surface water must be thoroughly investigated before we will accept any surface water connections from new development to the public sewer. Where a new surface water connection to the public sewer is proposed, we will require robust evidence to demonstrate the drainage hierarchy has been fully investigated and there are no more sustainable

options available for the management of surface water.

We request that the following drainage condition is attached to any subsequent approval:

Condition

Prior to the commencement of development, details of a sustainable surface water drainage scheme and a foul water drainage scheme shall be submitted to and approved in writing by the Local Planning Authority. The drainage schemes must include:

- (i) An investigation of the hierarchy of drainage options in the National Standards for Sustainable Drainage Systems (or any subsequent amendment thereof). This investigation shall include evidence of an assessment of ground conditions and the potential for infiltration of surface water;
- (ii) A restricted rate of discharge of surface water agreed with the local planning authority (if it is agreed that infiltration is discounted by the investigations);
- (iii) Levels of the proposed drainage systems including proposed ground and finished floor levels in AOD;
- (iv) Incorporate mitigation measures to manage the risk of sewer surcharge where applicable; and
- (v) Foul and surface water shall drain on separate systems.

The approved schemes shall be in accordance with the National Standards for Sustainable Drainage Systems (2025) or any subsequent replacement national standards.

Prior to occupation of the proposed development, the drainage schemes shall be completed in accordance with the approved details and retained thereafter for the lifetime of the development.

Reason: To promote sustainable development, secure proper drainage and to manage the risk of flooding and pollution.

To discuss their drainage proposals the applicant should contact our Developer Services team by email at SewerAdoptions@uuplc.co.uk. Alternative ways to contact the team are detailed in the Appendix, Section 6.0 'Contacts'.

Please note, United Utilities is not responsible for advising on rates of discharge to the local watercourse system. This is a matter for discussion with the Lead Local Flood Authority and / or the Environment Agency (if the watercourse is classified as a main river).

Local Lead Flood Authority response

Would recommend the following condition -

Development shall not commence until details of surface water drainage proposals have been submitted to and approved by the Local Planning Authority. The scheme must be based on the hierarchy of drainage options in the National Planning Practice Guidance and be designed in accordance with the Non-Statutory Technical Standards for Sustainable Drainage Systems (March 2015) or subsequent revisions of it. This must include assessment of potential SuDS options for surface water drainage with appropriate calculations and test results to support the chosen solution. Design details should comply with guidance contained in the Greater Manchester's Sustainable Drainage Design Guide, March 25. Details of proposed maintenance arrangements should also be provided.

Reason. To promote sustainable development. The current application contains insufficient information regarding the proposed drainage scheme to fully assess the

impact pursuant to the principles of the NPPF.

Would recommend the following informatives -

The site is to be drained on a separate system of drainage with surface water and foul sewage being combined at the last manhole before connection to public sewer

Surface water discharge to be limited to existing flow from site less a minimum 40% reduction in run-off to allow for climate change to prevent surcharge of public sewerage system downstream of the proposed development Chapter 10 of the National Planning Policy Framework - Meeting the Challenge of Climate Change, Flooding and Coastal Change and Unitary Development Plan Policy EN5/1 - New Development and Flood Risk and its associated SPD 16 Design and Layout of New Development in Bury. Climate change allowance should be increased to 70% for sites which fall within Flood Zone 3

Application forms for permission to connect to the public sewer should be obtained by telephoning United Utilities PLC on 08456 020406 or online at www.unitedutilities.com

Applications for sewer requisitions should be obtained by telephoning United Utilities PLC at either Dawson House (01925 235871) or Hathersage Road (0161 609 7513)

The applicant should ensure that any proposed driveways/paved areas (in excess of 5m²) situated at the front of properties are constructed of permeable or porous materials. The applicant should refer to Dept. of Communities & Local Government publication "Guidance on the Permeable Surfacing of Front Gardens" for design & construction details.

Greater Manchester Ecology Unit response

Would require as part of Technical Details -

- A preliminary ecological appraisal,
- A badger assessment and survey and
- A biodiversity net gain assessment.

Signed:

5 of 5
