Description of Proposed Works

Please describe the proposed works

The project consists of two linked components:

- Demolish and rebuild existing bay window on a like-for-like" basis. This is in accordance with a structural engineer's recommendation following an examination of cracks present under the bay window, in order to prevent further damage to the bay and its eventual collapse.
- Replace existing bay windows and first floor windows in the front elevation. Current windows are single glazed timber sashes, to be replaced with vacuum glazed timber sashes.

Has the work already been started without consent?

☐ Yes

☒ No

Explanation for Proposed Demolition Work

Why is it necessary to demolish all or part of the building(s) and/or structure(s)?

Following a homebuyer's survey identifying cracks in the brickwork underneath the bay window, a structural engineer's report identified that the bay window piers were twisted and distorted, with the piers separating from the window frames. The issues were not believed to be foundational.

The structural engineer's recommendation was that the bay window "should be partially rebuilt true and level with new brickwork, piers, lintels over the openings, stone cladding refixed, repointing etc. The bay window will probably need rebuilding from above the external ground floor level."

Does the proposed development require any materials to be used externally?

This is subject to exemptions, an exemption applies in relation to planning permission for a development which is the subject of a householder application, within the meaning of article 2(1) of the Town and Country Planning (Development Management Procedure) (England) Order (2015)*.
