

The orientation and roof face(s) of PV panels may vary by plot and house type, as it is dependent on achieving optimum energy generation. The final orientation and specific roof faces used (which may be one or multiple) will be confirmed after a plot-specific SAP assessment is completed.

Furthermore, the final layout and number of panels will be determined by the PV installer's design. This design will ensure that the minimum kilowatt-peak (kWp) established by the SAP assessment is achieved.

EV Charge Points

The position of any EV charge point is indicative only. Its final placement will be confirmed to suit the parking configuration of the plot.

Facing Brickwork - Cheshire Red Brick

Other Brickwork - Red Engineering Brick
Below DPC and Specials to Top of Brick Plinth
