PROPOSED FRONT ELEVATION

PROPOSED SIDE ELEVATION

PROPOSED REAR ELEVATION.

PROPOSED SIDE ELEVATION.

This architectural section drawing illustrates a building's internal structure and roof profile. The drawing is composed of black lines on a white background. On the left, a series of horizontal lines represent a stepped foundation or a series of terraces. Above these, a large rectangular volume is shown, with a smaller rectangular section attached to its left side. To the right of this main volume, there is a larger, more complex structure. This structure features a prominent, steeply sloped roofline that extends towards the right edge of the drawing. Below the main roofline, there are several horizontal lines indicating different levels or floors within the building. The overall impression is that of a technical architectural drawing, likely a section through a modern building with a complex, multi-level design.

A hand-drawn floor plan of a house. The layout includes a large rectangular area at the top labeled "GARAGE". Below the garage is a large open space. In the center is a rectangular room labeled "DINING". To the left of the dining room is a small square room labeled "ST." (staircase) with a spiral staircase. Below the dining room are two rooms: a "LOUNGE" on the left and a "KITCHEN" on the right. The kitchen has a small rectangular extension at its bottom. The entire plan is drawn with simple black lines on a white background.
