SAFETY, HEALTH AND ENVIRONMENTAL INFORMATION

In addition to the hazards/risks normally associated with the types of work detailed on this drawing, note the following

1. POTENTIAL FOR PRESENCE OF UNDERGROUND UTILITIES RISK. The Contractor shall undertake all necessary utility searches, consultation and site investigations and obtain all required permits/approvals from the relevant statutory undertakers before working in the vicinity of existing apparatus.

It is assumed that all works will be carried out by a competent contractor working, where appropriate, to an approved method statement

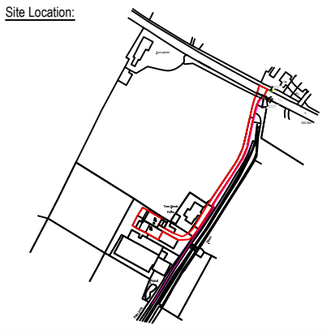

NOTES

1. All dimensions in meters unless noted otherwise.
2. Existing ground at formation level (subgrade) must achieve minimum CBR value of 2.5% before sub-base is laid.
3. Kerbs to be laid on ST4 concrete bed and backing.
