

Design and Access Statement

For a

**Cameras attached to the Flag
Pole**

At

Peel Tower

Holcombe,

Bury.

Use

In order to increase visitor numbers in the town of Bury and the Tourist Information centre a member of the public suggested installing cameras on the flag (Whilst repairing the flag pole) and live streaming the view to the Tourist Information centre. This would also increase people experiencing the view, those that cannot traverse the steep path and then the stairs up the tower, including disabled people.

The cameras are not set to record and encourage through the software people not to record the view so no personal data is being recorded.

Layout

The flag pole attached to the metal entrance housing at the very top of the tower.

Scale

The size of the flag pole is approx. 6 feet tall, the cameras are to be fitted so that they do not attract vandals whilst visiting the tower

Landscaping

The landscaping will not be changed

Appearance

Please see picture example below

ACCESS

Vehicle and transport links

The ward of North Manner is served by frequent bus services from Bury. There is a car park available on Lumb Carr Road exclusively for Peel Tower.

Inclusive Access

Access to the memorial is very difficult for infirm or disabled people and that is the reason for installing these cameras on the flag pole, so that everyone can gain the experience and see the view from the top never before experienced.
